

HOTSPOT -

In Microsoft Intune, you have the device compliance policies shown in the following table.

Name	Type	Encryption	Windows Defender antimalware	Mark device as not compliant	Assigned to
Policy1	Windows 8.1 and later	Require	<i>Not applicable</i>	5 days	Group1
Policy2	Windows 10 and later	Not configured	Require	7 days	Group2
Policy3	Windows 10 and later	Require	Require	10 days	Group2

The Intune compliance policy settings are configured as shown in the following exhibit.

Save

Discard

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as ⓘ

Compliant

Not Compliant

Enhanced jailbreak detection ⓘ

Enabled

Disabled

Compliance status validity period (days) ⓘ

30

✓

On June 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	Use BitLocker Drive Encryption (BitLocker)	Windows Defender	Member of
Device1	No	Enabled	Group1
Device2	No	Enabled	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On June 4, Device1 is marked as compliant.	☐	☐
On June 6, Device1 is marked as compliant.	☐	☐
On June 9, Device2 is marked as compliant.	☐	☐

Question #112

Topic 1

You have a Microsoft 365 subscription that contains a user named User1 and uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices that run Windows 11.

User provides remote support for 75 devices in the marketing department.

You need to add User1 to the Remote Desktop Users group on each marketing department device.

What should you configure?

A. an app configuration policy

B. a device compliance policy

C. an account protection policy

D. a device configuration profile

Question #113

Topic 1

HOTSPOT -

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

Name	Member of	License
User1	Group1	Microsoft 365 E5
User2	Group2	Microsoft 365 E5

For contoso.com, the Mobility (MDM and MAM) settings have the following configurations:

• MDM user scope: Group1

• MAM user scope: Group2

You purchase the devices shown in the following table:

Name	Platform
Device1	Windows 11
Device2	Windows 10
Device3	Android

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area

Statements	Yes	No
If User1 registers Device1 in contoso.com, Device1 is enrolled automatically in Microsoft Intune.	☐	☐
If User1 joins Device1 to contoso.com, Device2 is enrolled automatically in Microsoft Intune.	☐	☐
If User2 registers Device3 in contoso.com, Device3 is enrolled automatically in Microsoft Intune.	☐	☐

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to deploy and manage Windows devices.

You have 100 devices from users that left your company.

You need to repurpose the devices for new users by removing all the data and applications installed by the previous users. The solution must minimize administrative effort.

What should you do?

- A. Deploy a new configuration profile to the devices.
- B. Perform a Windows Autopilot reset on the devices.
- C. Perform an in-place upgrade on the devices.
- D. Perform a clean installation of Windows 11 on the devices.

HOTSPOT

-

You create a Windows Autopilot deployment profile.

You need to configure the profile settings to meet the following requirements:

- Automatically enroll new devices and provision system apps without requiring end-user authentication
- Include the hardware serial number in the computer name.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Create profile

Question #116

Topic 1

You have a computer named Computer1 that runs Windows 11.

A user named User1 plans to use Remote Desktop to connect to Computer1.

You need to ensure that the device of User1 is authenticated before the Remote Desktop connection is established and the sign in page appears.

What should you do on Computer1?

A. Turn on Reputation-based protection

B. Enable Network Level Authentication (NLA)

C. Turn on Network Discovery

D. Configure the Remote Desktop Configuration service

Question #117

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You have the devices shown in the following table.

Name	Operating system	Activation type
Device1	Windows 10 Pro for Workstation	Key
Device2	Windows 11 Pro	Key
Device3	Windows 11 Pro	Subscription

Which devices can be changed to Windows 11 Enterprise by using subscription activation?

A. Device3 only

B. Device2 and Device3 only

C. Device1 and Device2 only

D. Device1, Device2, and Device3

HOTSPOT

-

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Remote Desktop is enabled on Computer2.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

Computer2 contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for Computer2 are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	☐	☐
User2 can establish a Remote Desktop session to Computer2.	☐	☐
User3 can establish a Remote Desktop session to Computer2.	☐	☐

Question #119

Topic 1

You have two computers named Computer1 and Computer2 that run Windows 10. Computer2 has Remote Desktop enabled.

From Computer1, you connect to Computer2 by using Remote Desktop Connection.

You need to ensure that you can access the local drives on Computer1 from within the Remote Desktop session.

What should you do?

A. From Computer2, configure the Remote Desktop settings.

B. From Windows Defender Firewall on Computer1, allow Remote Desktop.

C. From Windows Defender Firewall on Computer2, allow File and Printer Sharing.

D. From Computer1, configure the Remote Desktop Connection settings.

Question #120

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune.

You have five new Windows 11 Pro devices.

You need to prepare the devices for corporate use. The solution must meet the following requirements:

- Install Windows 11 Enterprise on each device.
- Install a Windows Installer (MSI) package named App1 on each device.
- Add a certificate named Certificate1 that is required by App1.
- Join each device to Azure AD.

Which three provisioning options can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. subscription activation

B. a custom Windows image

C. an in-place upgrade

D. Windows Autopilot

E. provisioning packages

Question #121

Topic 1

DRAG DROP

-

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1.

You import a Windows 11 image to DS1.

You have an executable installer for an application named App1.

You need to ensure that App1 will be installed for all the task sequences that deploy the image.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Modify a Windows 11 operating system setting.

Modify a selection profile.

Add App1 to DS1.

Identify the GUID of App1.

Modify CustomSettings.ini.

Answer Area

1

Question #122

Topic 1

HOTSPOT

-

You have the devices shown in the following table.

Name	Operating system	Description
Device1	32-bit version of Windows 10	Retired device
Device2	64-bit version of Windows 11	New device
Server1	Windows Server 2019	File server

You need to migrate app data from Device1 to Device2. The data must be encrypted and stored on Server1 during the migration.

Which command should you run on each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device1:

▼

LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key: "mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"

Device2:

▼

LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key: "mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"

Question #123

Topic 1

You have a Microsoft 365 subscription.

You plan to use Windows Autopilot to provision 25 Windows 11 devices.

You need to configure the Out-of-box experience (OOBE) settings.

What should you create in the Microsoft Intune admin center?

A. an enrollment status page (ESP)

B. a deployment profile

C. a compliance policy

D. a PowerShell script

E. a configuration profile

https://www.examtopics.com/exams/microsoft/md-102/custom-view/

9/169

Question #124

Topic 1

You have an Azure AD tenant that contains the devices shown in the following table.

Name	Operating system	Azure AD join type
Device1	Windows 11 Pro	Joined
Device2	Windows 11 Pro	Registered
Device3	Windows 10 Pro	Joined
Device4	Windows 10 Pro	Registered

You purchase Windows 11 Enterprise E5 licenses.

Which devices can use Subscription Activation to upgrade to Windows 11 Enterprise?

A. Device1 only

B. Device1 and Device2 only

C. Device1 and Device3 only

D. Device1, Device2, Device3, and Device4

Question #125

Topic 1

You have a Microsoft 365 Subscription that uses Microsoft Intune.

You add apps to Intune as shown in the following table.

Name	App type
App1	Android store app
App2	Android line-of-business app
App3	Managed Google Play app

You need to create an app configuration policy named Policy1 for the Android Enterprise platform.

Which apps can you manage by using Policy1?

A. App2 only

B. App3 only

C. App1 and App3 only

D. App2 and App3 only

E. App1, App2, and App3

Question #126

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune.

You need to ensure that you can deploy apps to Android Enterprise devices.

What should you do first?

A. Create a configuration profile.

B. Add a certificate connector.

C. Configure the Partner device management settings.

D. Link your managed Google Play account to Intune.

Question #127

Topic 1

You have a Microsoft 365 tenant that uses Microsoft Intune.

You use the Company Portal app to access and install published apps to enrolled devices.

From the Microsoft Intune admin center, you add a Microsoft Store app.

Which two App information types are visible in the Company Portal?

NOTE: Each correct selection is worth one point.

A. Privacy URL

B. Information URL

C. Developer

D. Owner

Question #128

Topic 1

HOTSPOT

-

You have 200 computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune.

You need to set a custom image as the wallpaper and sign-in screen.

Which two settings should you configure in the Device restrictions configuration profile? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Question #129

Topic 1

You have computers that run Windows 11 Pro. The computers are joined to Azure AD and enrolled in Microsoft Intune.

You need to upgrade the computers to Windows 11 Enterprise.

What should you configure in Intune?

A. a device compliance policy

B. a device cleanup rule

C. a device enrollment policy

D. a device configuration profile

Question #130

Topic 1

You have computers that run Windows 10 and are managed by using Microsoft Intune.

Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1.

What should you configure in the device configuration profile?

A. Microsoft Defender Exploit Guard

B. Microsoft Defender Application Guard

C. Microsoft Defender SmartScreen

D. Microsoft Defender Application Control

Question #131

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune.

You need to create Endpoint security policies to meet the following requirements:

- Hide the Firewall & network protection area in the Windows Security app.
- Disable the provisioning of Windows Hello for Business on the devices.

Which two policy types should you use? To answer, select the policies in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Manage

Antivirus

Disk encryption

Firewall

Endpoint detection and response

Attack surface reduction

Account protection

Device compliance

Conditional access

Question #132

Topic 1

You have a Microsoft 365 subscription that contains 100 devices enrolled in Microsoft Intune.

You need to review the startup processes and how often each device restarts.

What should you use?

A. Endpoint analytics

B. Device Management

C. Azure Monitor

D. Intune Data Warehouse

<https://www.examtopics.com/exams/microsoft/md-102/custom-view/>

14/169

Question #133

Topic 1

DRAG DROP

-

You have a Microsoft 365 subscription that contains devices enrolled in Microsoft Intune.

You need to create Endpoint security policies to enforce the following requirements:

- Computers that run macOS must have FileVault enabled.
- Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.
- Computers that run Windows 10 must have Microsoft Defender Application Control enabled.

Which Endpoint security feature should you use for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Features	Answer Area
Account protection	Computers that run macOS must have FileVault enabled:
Attack surface reduction (ASR)	Computers that run Windows 10 must have Microsoft Defender Application Control enabled:
Disk encryption	Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled:
Endpoint detection and response (EDR)	

Question #134

Topic 1

Your company has 200 computers that run Windows 10. The computers are managed by using Microsoft Intune.

Currently, Windows updates are downloaded without using Delivery Optimization.

You need to configure the computers to use Delivery Optimization.

What should you create in Intune?

A. a device compliance policy

B. a Windows 10 update ring

C. a device configuration profile

D. an app protection policy

Question #135

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

Auto-enrollment in Intune is configured.

You have 100 Windows 11 devices in a workgroup.

You need to connect the devices to the corporate wireless network and enroll 100 new Windows 11 devices in Intune.

What should you use?

A. a provisioning package

B. a Group Policy Object (GPO)

C. mobile device management (MDM) automatic enrollment

D. a device configuration policy

Question #136

Topic 1

HOTSPOT

-

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains Windows 10 devices as shown in the following exhibit.

Name	Enabled	OS	Version	Join Type	Owner	MDM	Compliant
 LON-CL2	✔ Yes	Windows	10.0.17763.615	Azure AD registered	User2	Microsoft Intune	✔ Yes
 LON-CL4	✔ Yes	Windows	10.0.17763.107	Azure AD joined	User1	Microsoft Intune	✔ Yes

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Identified by Intune as a personal device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

Identified by Intune as a corporate device:

LON-CL2 only

LON-CL4 only

Both LON-CL2 and LON-CL4

Neither LON-CL2 or LON-CL4

Question #137

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices. All devices are in the same time zone.

You create an update rings policy and assign the policy to all Windows devices.

On the November 1, you pause the update rings policy.

All devices remain online.

Without further modification to the policy, on which date will the devices next attempt to update?

A. December 1

B. December 6

C. November 15

D. November 22

Question #138

Topic 1

You have a Microsoft 365 E5 subscription that contains the devices shown in the following table.

Name	Operating system	Enrolled in Microsoft Intune
Device1	Windows 11	Yes
Device2	Windows 10	Yes
Device3	Android	Yes
Device4	iOS	Yes

All devices have Microsoft Edge installed.

From the Microsoft Intune admin center, you create a Microsoft Edge Baseline profile named Edge1.

You need to apply Edge1 to all the supported devices.

To which devices should you apply Edge1?

A. Device1 only

B. Device1 and Device2 only

C. Device1, Device2, and Device3 only

D. Device1, Device2, and Device4 only

E. Device1, Device2, Device3, and Device4

Question #139

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription that uses Microsoft Intune.

You plan to manage Windows updates by using Intune.

You create an update ring for Windows 10 and later and configure the User experience settings for the ring as shown in the following exhibit.

Question #140

Topic 1

You have a Microsoft 365 tenant.

You have devices enrolled in Microsoft Intune.

You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft OneDrive for Business.

You need to identify which noncompliant devices attempt to access OneDrive for Business.

What should you do?

A. From the Microsoft Entra admin center, review the Conditional Access Insights and Reporting workbook.

B. From the Microsoft Intune admin center, review Device compliance report.

C. From the Microsoft Intune admin center, review the Noncompliant devices report.

D. From the Microsoft Intune admin center, review the Setting compliance report.

Question #141

Topic 1

HOTSPOT

-

You use Microsoft Intune to manage Windows 10 devices.

You are designing a reporting solution that will provide reports on the following:

• Compliance policy trends

• Trends in device and user enrollment

• App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Data source:

Audit logs in Azure AD

Audit logs in Microsoft Intune

Azure Synapse Analytics

The Microsoft Intune Data Warehouse

Data visualization tool:

Azure Data Studio

Microsoft Power BI

Microsoft Intune admin center

Question #142

Topic 1

Your network contains an Active Directory domain. The domain contains 2,000 computers that run Windows 10.

You implement hybrid Azure AD and Microsoft Intune.

You need to automatically register all the existing computers to Azure AD and enroll the computers in Intune. The solution must minimize administrative effort.

What should you use?

A. an Autodiscover address record

B. a Group Policy object (GPO)

C. an Autodiscover service connection point (SCP)

D. a Windows Autopilot deployment profile

HOTSPOT

-

You have two computers that run Windows 10. The computers are enrolled in Microsoft Intune as shown in the following table.

Name	Member of
Computer1	Group1
Computer2	Group1, Group2

Windows 10 update rings are defined in Intune as shown in the following table.

Name	Quality deferral (days)	Assigned
Ring1	3	Yes
Ring2	10	Yes

You assign the update rings as shown in the following table.

Name	Include	Exclude
Ring1	Group1	Group2
Ring2	Group2	Group1

What is the effect of the configurations on Computer1 and Computer2? To answer, select the appropriate options in the answer area.

Answer Area

Quality deferral on Computer1:

Device3	Android	User3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	☐	☐
If User2 signs in to Device2, Device2 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	☐	☐
If User3 signs in to Device3, Device3 will have both ConfigurationProfile1 and CompliancePolicy1 assigned.	☐	☐

Question #148

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription that contains 1,000 iOS devices. The devices are enrolled in Microsoft Intune as follows:

- Two hundred devices are enrolled by using the Intune Company Portal.
- Eight hundred devices are enrolled by using Apple Automated Device Enrollment (ADE).

You create an iOS/iPadOS software updates policy named Policy1 that is configured to install iOS/iPadOS 15.5.

How many iOS devices will Policy1 update, and what should you configure to ensure that only iOS/iPadOS 15.5 is installed? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Number of devices:

200
800
1000

Configure a:

Compliance policy
Conditional Access policy
Device restriction policy

HOTSPOT -

Case study -

Overview -

ADatum Corporation is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

ADatum has a Microsoft 365 E5 subscription.

Environment -

Network Environment -

The network contains an on-premises Active Directory domain named adatum.com. The domain contains the servers shown in the following table.

Name	Operating system	Role
DC1	Windows Server 2019	Domain controller
Server1	Windows Server 2016	Member server
Server2	Windows Server 2019	Member server

ADatum has a hybrid Azure AD tenant named adatum.com.

Users and Groups -

The adatum.com tenant contains the users shown in the following table.

Name	Azure AD role	Member of
User1	Cloud Device Administrator	GroupA
User2	Azure AD Joined Device Local Administrator	GroupB
User3	Global Reader	GroupA, GroupB
User4	Global Administrator	Group1

All users are assigned a Microsoft Office 365 license and an Enterprise Mobility + Security E3 license.

Enterprise State Roaming is enabled for Group1 and GroupA.

Group1 and Group2 have a Membership type of Assigned.

Devices -

ADatum has the Windows 10 devices shown in the following table.

Name	Type	Member of	Scope (Tags)
Device1	Corporate-owned	Group1	Default
Device2	Corporate-owned	Group1, Group2	Tag2
Device3	Personally-owned	Group1	Tag1
Device4	Personally-owned	Group2	Tag2
Device5	Corporate-owned	Group3	Default

The Windows 10 devices are joined to Azure AD and enrolled in Microsoft Intune.

The Windows 10 devices are configured as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Secure Boot	VPN connection
Device1	Yes	No	VPN1
Device2	Yes	Yes	VPN1, VPN3
Device3	No	No	VPN3
Device4	No	Yes	None
Device5	Yes	No	None

All the Azure AD joined devices have an executable file named C:\AppA.exe and a folder named D:\Folder1.

Microsoft Intune Configuration -

Microsoft Intune has the compliance policies shown in the following table.

Name	Configuration	Assignment
Policy1	Require BitLocker only	Group1
Policy2	Require Secure Boot only	Group1
Policy3	Require BitLocker and Secure Boot	Group2

The Compliance policy settings are shown in the following exhibit.

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Currently, there are no devices deployed by using Windows Autopilot.

The Intune connector for Active Directory is installed on Server1.

Requirements -

Planned Changes -

ADatum plans to implement the following changes:

- Purchase a new Windows 10 device named Device6 and enroll the device in Intune
- New computers will be deployed by using Windows Autopilot and will be hybrid Azure AD joined.
- Deployed a network boundary configuration profile that will have the following settings:
 - Name: Boundary1

- Network boundary: 192.168.1.0/24
- Scope tags: Tag1
- Assignments:
- Included groups: Group1, Group2
- Deploy two VPN configuration profiles named Connection1 and Connection2 that will have the following settings:
- Name: Connection1
- Connection name: VPN1
- Connection type: L2TP
- Assignments:
- Included groups: Group1, Group2, GroupA
- Excluded groups: --
- Name: Connection2
- Connection name: VPN2
- Connection type: IKEv2
- Assignments:

- Excluded groups: GroupB

Technical Requirements -

ADatum must meet the following technical requirements:

- Users in GroupA must be able to deploy new computers.
- Administrative effort must be minimized.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 joins a Windows 10 device to Azure AD, the device will be enrolled in Intune automatically.	☐	☐
If User2 joins a Windows 10 device to Azure AD, the device will be enrolled in Intune automatically.	☐	☐
If User3 joins a Windows 10 device to Azure AD, the device will be enrolled in Intune automatically.	☐	☐

Case study -

Overview -

ADatum Corporation is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

ADatum has a Microsoft 365 E5 subscription.

Environment -

Network Environment -

The network contains an on-premises Active Directory domain named adatum.com. The domain contains the servers shown in the following table.

Name	Operating system	Role
DC1	Windows Server 2019	Domain controller
Server1	Windows Server 2016	Member server
Server2	Windows Server 2019	Member server

ADatum has a hybrid Azure AD tenant named adatum.com.

Users and Groups -

The adatum.com tenant contains the users shown in the following table.

Name	Azure AD role	Member of
User1	Cloud Device Administrator	GroupA
User2	Azure AD Joined Device Local Administrator	GroupB
User3	Global Reader	GroupA, GroupB
User4	Global Administrator	Group1

All users are assigned a Microsoft Office 365 license and an Enterprise Mobility + Security E3 license.

Enterprise State Roaming is enabled for Group1 and GroupA.

Group1 and Group2 have a Membership type of Assigned.

Devices -

ADatum has the Windows 10 devices shown in the following table.

Name	Type	Member of	Scope (Tags)
Device1	Corporate-owned	Group1	Default
Device2	Corporate-owned	Group1, Group2	Tag2
Device3	Personally-owned	Group1	Tag1
Device4	Personally-owned	Group2	Tag2
Device5	Corporate-owned	Group3	Default

The Windows 10 devices are joined to Azure AD and enrolled in Microsoft Intune.

The Windows 10 devices are configured as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Secure Boot	VPN connection
Device1	Yes	No	VPN1
Device2	Yes	Yes	VPN1, VPN3
Device3	No	No	VPN3
Device4	No	Yes	None
Device5	Yes	No	None

All the Azure AD joined devices have an executable file named C:\AppA.exe and a folder named D:\Folder1.

Microsoft Intune Configuration -

Microsoft Intune has the compliance policies shown in the following table.

Name	Configuration	Assignment
Policy1	Require BitLocker only	Group1

Technical Requirements -

ADatum must meet the following technical requirements:

- Users in GroupA must be able to deploy new computers.
- Administrative effort must be minimized.

Which user can enroll Device6 in Intune?

A. User4 and User1 only

B. User4 and User2 only

C. User4, User1, and User2 only

D. User1, User2, User3, and User4

Question #153

Topic 1

You have a Microsoft 365 subscription that contains 1,000 iOS devices and includes Microsoft Intune.

You need to prevent the printing of corporate data from managed apps on the devices.

What should you configure?

A. an app configuration policy

B. a security baseline

C. an app protection policy

D. an iOS app provisioning profile

Question #154

Topic 1

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
Admin1	Application Administrator
Admin2	Cloud Application Administrator
Admin3	Office Apps Administrator
Admin4	Security Administrator

In the Microsoft 365 Apps admin center, you create a Microsoft Office customization.

Which users can download the Office customization file from the admin center?

A. Admin3 only

B. Admin1 and Admin3 only

C. Admin3 and Admin4 only

D. Admin1, Admin2, and Admin3 only

E. Admin1, Admin2, Admin3, Admin4

Question #155

Topic 1

You have a Microsoft 365 E5 subscription.

You need to download a report that lists all the devices that are NOT enrolled in Microsoft Intune and are assigned an app protection policy.

What should you select in the Microsoft Intune admin center?

A. Reports, and then Device compliance

B. Apps, and then App protection policies

C. Devices, and then Monitor

D. Apps, and then Monitor

Question #156

Topic 1

You have a Microsoft 365 tenant that contains the objects shown in the following table.

Name	Type
Admin1	User
Group1	Microsoft 365 group
Group2	Distribution group
Group3	Mail-enabled security group
Group3	Security group

In the Microsoft Intune admin center, you are creating a Microsoft 365 Apps app named App1.

To which objects can you assign App1?

A. Group3 and Group4 only

B. Admin1, Group3, and Group4 only

C. Group1, Group3, and Group4 only

D. Group1, Group2, Group3, and Group4 only

E. Admin1, Group1, Group2, Group3, and Group4

HOTSPOT -

You have a Microsoft 365 E5 subscription.

You create an app protection policy for Android device named Policy1 as shown in the following exhibit.

[Home](#) > [Apps](#) >

Create policy

✓ Basics

2 Apps

3 Data protection

4 Access requirements

...

Choose how you want to apply this policy to apps on different devices. Then add at least one app.

Target to apps on all device types ⓘ

NoYes

Unmanaged

Target policy to

All Apps

ⓘ

We'll continue to add managed apps to your policy as they become available in Intune. [View a list of apps that will be targeted](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

To apply Policy1 to an Android device, you must

install the Company Portal app on the device
install the Microsoft Authenticator app on the device
onboard the device to Microsoft Defender for Endpoint
onboard the device to the Microsoft Purview compliance portal

When Policy1 is assigned, the policy will apply to

users only
devices only
users and devices

Question #158

Topic 1

You have a Microsoft 365 subscription that includes Microsoft Intune.

You have 500 corporate-owned Android devices enrolled as fully managed devices.

You need to prepare an app named App1 for deployment to the devices.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. From the Intune Company Portal, download App1.

B. Sync App1 with Intune.

C. From the Managed Google Play Store, approve App1.

D. Create an OEMConfig profile.

Question #159

Topic 1

You have the Windows 10 devices shown in the following table.

Name	Operating system	Edition
Device1	64-bit version of Windows 10	Home
Device2	32-bit version of Windows 10	Pro
Device3	64-bit version of Windows 10	Enterprise
Device4	64-bit version of Windows 10	Pro

You plan to upgrade the devices to Windows 11 Enterprise.

On which devices can you perform a direct in-place upgrade to Windows 11 Enterprise?

A. Device3 only

B. Device3 and Device 4 only

C. Device2, Device3, and Device4 only

D. Device1, Device3, and Device4 only

E. Device1, Device2, Device3, and Device4 only

Question #160

Topic 1

HOTSPOT -

Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure AD.

A user named User1 uses the domain-joined devices shown in the following table.

Name	Operating system
Device1	Windows 10 Pro
Device2	Windows 11 Pro

In the Microsoft Entra admin center, you assign a Windows 11 Enterprise E5 license to User1.

You need to identify what will occur when User1 next signs in to the devices.

What should you identify for each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device1:

▼

Will activate as Windows 11 Enterprise

Will not upgrade to Windows 11 Enterprise

Will perform a clean installation of Windows 11 Enterprise

Will perform an in-place upgrade to Windows 11 Enterprise

Device2:

▼

Will activate as Windows 11 Enterprise

Will not upgrade to Windows 11 Enterprise

Will perform a clean installation of Windows 11 Enterprise

Will perform an in-place upgrade to Windows 11 Enterprise

<https://www.examtopics.com/exams/microsoft/md-102/custom-view/>

46/169

HOTSPOT -

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1.

You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?

NOTE: Each correct selection is worth one point.

Answer Area

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Question #162

Topic 1

DRAG DROP

-

You have a Microsoft 365 subscription that uses Microsoft Intune.

You plan to use Windows Autopilot to provision 25 Windows 11 devices.

You need to meet the following requirements during device provisioning:

- Display the progress of app and profile deployments.
- Join the devices to Azure AD.

What should you configure to meet each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings	Answer Area
CNAME Validation	
Co-management Settings	Display the progress of app and profile deployments:
Deployment Profiles	Join the devices to Azure AD:
Enrollment notifications	
Enrollment Status Page	

Question #163

Topic 1

Your company has a Remote Desktop Gateway (RD Gateway).

You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway.

You need to configure a Remote Desktop connection to connect through the gateway.

Which setting should you configure?

A. Connect from anywhere

B. Server authentication

C. Connection settings

D. Local devices and resources

Question #164

Topic 1

You have a Microsoft Deployment Toolkit (MDT) deployment share.

You plan to deploy Windows 11 by using the Standard Client Task Sequence template.

You need to modify the task sequence to perform the following actions:

- Format disks to support Unified Extensible Firmware Interface (UEFI).
- Create a recovery partition.

Which phase of the task sequence should you modify?

A. Preinstall

B. PostInstall

C. Install

D. Initialization

Question #165

Topic 1

DRAG DROP

-

Your network contains an Active Directory domain.

You install the Microsoft Deployment Toolkit (MDT) on a server.

You have a custom image of Windows 11.

You need to deploy the image to 100 devices by using MDT.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Enable multicast.

Install Windows Deployment Services (WDS).

Create a deployment share.

Add the Windows 11 image.

Create a task sequence.

Answer Area

3

https://www.examtopics.com/exams/microsoft/md-102/custom-view/

49/169

Question #166

Topic 1

You have the Microsoft Deployment Toolkit (MDT) installed.

You install and customize Windows 11 on a reference computer.

You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers.

Which command should you run before you capture the image?

A. dism

B. wpeinit

C. sysprep

D. bcdedit

Question #167

Topic 1

Your network contains an on-premises Active Directory domain. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

You install Windows Admin Center on Computer1.

You need to manage Computer2 from Computer1 by using Windows Admin Center.

What should you do on Computer2?

A. Update the TrustedHosts list.

B. Run the Enable-PSRemoting cmdlet.

C. Allow Windows Remote Management (WinRM) through the Microsoft Defender firewall.

D. Add an inbound Microsoft Defender Firewall rule.

HOTSPOT

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

To apply the profile to a new computer, you must first

join the device to Azure AD
enroll the device in Microsoft Intune
import a CSV file into Windows Autopilot

When the Windows Autopilot profile is applied to a computer, the computer will be

joined to Azure AD only
registered in Azure AD only
joined to Active Directory only
joined to Active Directory and registered in Azure AD

Question #169

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You plan to create Windows 11 device builds for the marketing and research departments. The solution must meet the requirements:

- Marketing department devices must support Windows Update for Business.
- Research department devices must have support for feature update versions for up to 36 months from release.

What is the minimum Windows 11 edition required for each department? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Marketing:

▼

Windows 11 Enterprise
Windows 11 Pro
Windows 11 Pro for Workstations

Research:

▼

Windows 11 Enterprise
Windows 11 Pro
Windows 11 Pro for Workstations

Question #170

Topic 1

You have an Azure AD tenant named contoso.com.

You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	None
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

A. Device2 only

B. Device3 only

C. Device1 and Device3 only

D. Device1, Device2, and Device3

Question #171

Topic 1

HOTSPOT

-

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant.

You have a Microsoft 365 subscription.

You plan to use Windows Autopilot to deploy new Windows devices.

You plan to create a deployment profile.

You need to ensure that the deployment meets the following requirements:

- Devices must be joined to AD DS regardless of their current working location.
- Users in the marketing department must have a line-of-business (LOB) app installed during the deployment.

The solution must minimize administrative effort.

What should you do for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Devices must be joined to AD DS regardless of their current working location:

Deploy Always On VPN.
Install the Intune connector for Active Directory.
Modify the Autopilot deployment profile.
Edit the Co-management settings in Intune.

The marketing department users must have an LOB app installed during the deployment:

Modify the Autopilot deployment profile.
Create a Microsoft Intune app deployment.
Create a device configuration profile in Intune.

Question #172

Topic 1

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Enable the Allow Remote Shell access setting.

B. Enable the Allow remote server management through WinRM setting.

C. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.

D. Enable the Windows Defender Firewall: Allow inbound Remote Desktop exceptions setting.

E. Set the Startup Type of the Remote Registry service to Automatic.

F. Enable the Windows Defender Firewall: Allow inbound remote administration exception setting.

Question #173

Topic 1

You have a Microsoft 365 Business Standard subscription and 100 Windows 10 Pro devices.

You purchase a Microsoft 365 E5 subscription.

You need to upgrade the Windows 10 Pro devices to Windows 10 Enterprise. The solution must minimize administrative effort.

Which upgrade method should you use?

- A. Windows Autopilot
- B. a Microsoft Deployment Toolkit (MDT) lite-touch deployment
- C. Subscription Activation
- D. an in-place upgrade by using Windows installation media

Question #174

Topic 1

HOTSPOT -

You have devices that are not rooted enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.

In Intune, you create a device compliance location that has the following configurations:

- Name: Network1
- IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has the following configurations:

- Name: Policy1
- Device health: Rooted devices: Block
- Locations: Location: Network1
- Mark device noncompliant: Immediately
- Assigned: Group1

The Intune device compliance policy has the following configurations:

- Mark devices with no compliance policy assigned as: Compliant
- Enhanced jailbreak detection: Enabled
- Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	☐	☐
Device2 is marked as compliant.	☐	☐
Device3 is marked as compliant.	☐	☐

Question #175

Topic 1

You need to implement mobile device management (MDM) for personal devices that run Windows 11. The solution must meet the following requirements:

- Ensure that you can manage the personal devices by using Microsoft Intune.
- Ensure that users can access company data seamlessly from their personal devices.
- Ensure that users can only sign in to their personal devices by using their personal account.

What should you use to add the devices to Azure AD?

A. Azure AD registered

B. hybrid Azure AD join

C. Azure AD joined

Question #176

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription.

All computers are enrolled in Microsoft Intune.

You have business requirements for securing your Windows 11 environment as shown in the following table.

Requirement	Detail
Requirement1	Ensure that Microsoft Exchange Online can be accessed from known locations only.
Requirement2	Lock a device that has a high Microsoft Defender for Endpoint risk score.

What should you implement to meet each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement1:

A conditional access policy
A device compliance policy
A device configuration profile

Requirement2:

A conditional access policy
A device compliance policy
A device configuration profile

Question #177

Topic 1

HOTSPOT -

You have a Microsoft 365 subscription that contains two security groups named Group1 and Group2. Microsoft 365 uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to assign roles in Intune to meet the following requirements:

- The members of Group1 must manage Intune roles and assignments.
- The members of Group2 must assign existing apps and policies to users and devices.

The solution must follow the principle of least privilege.

Which role should you assign to each group? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Group1:

▼

Help Desk Operator
Intune Role Administrator
Intune Service Administrator
Policy and Profile Manager

Group2:

▼

Help Desk Operator
Intune Role Administrator
Intune Service Administrator
Policy and Profile Manager

HOTSPOT

-

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Encryption	Secure Boot	Member of
Device1	Windows 10	Yes	No	Group1
Device2	Windows 10	No	Yes	Group2
Device3	Android	No	<i>Not applicable</i>	Group3

Intune includes the device compliance policies shown in the following table.

Name	Platform	Encryption	Secure Boot
Policy1	Windows 10	Not configured	Not configured
Policy2	Windows 10	Not configured	Required
Policy3	Windows 10	Required	Required
Policy4	Android	Not configured	<i>Not applicable</i>

The device compliance policies has the assignments shown in the following table.

Name	Assigned to
Policy1	Group1
Policy2	Group1, Group2
Policy3	Group3
Policy4	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 is marked as compliant.	☐	☐
Device2 is marked as compliant.	☐	☐
Device3 is marked as compliant.	☐	☐

HOTSPOT

-

You have a Microsoft 365 subscription that contains a user named User1. The subscription contains devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of	Description
Device1	Windows 11	Group1	Disk encryption is not configured.
Device2	Windows 10	Group2	Disk encryption is configured.
Device3	Android	Group3	Device local storage is not encrypted.

Microsoft Edge is available on all the devices.

Intune has the device compliance policies shown in the following table.

Name	Platform	Setting	Applied to
Compliance1	Windows 10 and later	Require encryption of data storage on device	Group2
Compliance2	Android Enterprise	Require encryption of data storage on device	Group3

The Compliance policy settings are configured as shown in the exhibit. (Click the Exhibit tab.)

 **Compliance policies** | Compliance policy settings ... ✕

You create the following Conditional Access policy:

- Name: Policy1
- Assignments
 - o Users and groups: User1
 - o Cloud apps or actions: Office 365 SharePoint Online
- Access controls
 - o Grant: Require device to be marked as compliant
- Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can access Microsoft SharePoint Online from Device1 by using Microsoft Edge.	☐	☐
User1 can access Microsoft SharePoint Online from Device2 by using Microsoft Edge.	☐	☐
User1 can access Microsoft SharePoint Online from Device3 by using Microsoft Edge.	☐	☐

Question #180

Topic 1

You have an Azure AD tenant named contoso.com.

You need to ensure that users are not added automatically to the local Administrators group when they join their Windows 11 device to contoso.com.

What should you configure?

- A. Windows Autopilot
- B. provisioning packages for Windows
- C. Security defaults in Azure AD
- D. Device settings in Azure AD

Question #181

Topic 1

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Intune admin center, you define the company’s network as a location named Location1.

Which devices can use network location-based compliance policies?

- A. Device1 only
- B. Device2 only
- C. Device1 and Device2 only
- D. Device2 and Device3 only
- E. Device1, Device2, and Device3

Question #182

Topic 1

You have an Azure subscription.

You have an on-premises Windows 11 device named Device1.

You plan to monitor Device1 by using Azure Monitor.

You create a data collection rule (DCR) named DCR1 in the subscription.

To what should you associate DCR1?

A. Azure Network Watcher

B. Device1

C. a Log Analytics workspace

D. a Monitored Object

HOTSPOT -

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to configure an update ring that meets the following requirements:

- Fixes and improvements to existing Windows functionality can be deferred for 14 days but will install automatically seven days after that date.
- The installation of new Windows features can be deferred for 90 days but will install automatically 10 days after that date.
- Devices must restart automatically three days after an update is installed.

How should you configure the update ring? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Feature update deferral period (days):

▼

37101490

Quality update deferral period (days):

▼

37101490

Deadline for feature updates:

▼

37101490

Grace period:

▼

37101490

Question #184

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription.

You need to review and implement Microsoft 365 Defender device onboarding. The solution must meet the following requirements:

- View onboarded devices that have the Chromium-based version for Microsoft Edge installed.
- Download an onboarding package for a Windows 11 device.
- Minimize administrative effort.

Which two settings should you use in the Microsoft 365 Defender portal? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Question #185

Topic 1

You have a Microsoft 365 subscription that contains 500 computers that run Windows 11. The computers are Azure AD joined and are enrolled in Microsoft Intune.

You plan to manage Microsoft Defender Antivirus on the computers.

You need to prevent users from disabling Microsoft Defender Antivirus.

What should you do?

A. From the Microsoft Intune admin center, create a security baseline.

B. From the Microsoft 365 Defender portal, enable tamper protection.

C. From the Microsoft Intune admin center, create an account protection policy.

D. From the Microsoft Intune admin center, create an endpoint detection and response (EDR) policy.

Question #186

Topic 1

HOTSPOT

-

You have 1,000 computers that run Windows 10 and are members of an Active Directory domain.

You need to capture the event logs from the computers to Azure.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Azure service to provision:

An Azure Storage account
Azure Cosmos DB
Azure SQL Database
Log Analytics

Action to perform on the computers:

Create a collector-initiated subscription
Install the Azure Monitor Agent
Enroll in Microsoft Intune
Register to Azure AD

Question #187

Topic 1

You have a computer named Computer5 that has Windows 10 installed.

You create a Windows PowerShell script named config.ps1.

You need to ensure that config.ps1 runs after feature updates are installed on Computer5.

Which file should you modify on Computer5?

A. LiteTouch.wsf

B. SetupConfig.ini

C. Unattend.bat

D. Unattend.xml

Question #188

Topic 1

HOTSPOT

-

You have a Microsoft 365 tenant and an internal certification authority (CA).

You need to use Microsoft Intune to deploy the root CA certificate to managed devices.

Which type of Intune policy and profile type template should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Policy type:

▼

App configuration policy

App protection policy

Compliance policy

Configuration profile

Profile type template:

▼

Imported public key pair (PKCS) certificate

Public key pair (PKCS) certificate

Simple Certificate Enrollment Protocol (SCEP) certificate

Trusted certificate

HOTSPOT

-

Your company uses Microsoft Defender for Endpoint. Microsoft Defender for Endpoint includes the device groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped devices (default)	Not applicable

You onboard a computer to Microsoft Defender for Endpoint as shown in the following exhibit.

computer1

Actions ▾

Domain: adatum.com
OS: Windows10 64-bit (Build 17134)

Machine IP addresses >

What is the effect of the Microsoft Defender for Endpoint configuration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Computer1 will be a member of:

Group3 only
Group4 only
Group5 only
Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

Group1 only
Group2 only
Group1 and Group2 only
Group1, Group2, Group3, Group4, and Group5

Question #190

Topic 1

You manage 1,000 devices by using Microsoft Intune.

You review the Device compliance trends report.

For how long will the report display trend data?

A. 30 days

B. 60 days

C. 90 days

D. 365 days

Question #191

Topic 1

You have a Microsoft 365 E5 subscription that contains 100 iOS devices enrolled in Microsoft Intune.

You need to ensure that notifications of iOS updates are deferred for 30 days after the updates are released.

What should you create?

A. an iOS app provisioning profile

B. a device configuration profile based on the Device features templates

C. an update policy for iOS/iPadOS

D. a device configuration profile based on the Device restrictions template

Question #192

Topic 1

HOTSPOT -

You have a Microsoft 365 subscription that uses Microsoft Intune and contains 100 Windows 10 devices.

You need to create Intune configuration profiles to perform the following actions on the devices:

- Deploy a custom Start layout.
- Rename the local Administrator account.

Which profile type template should you use for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Deploy a custom Start layout:

▼

Delivery optimization

Device restriction

Endpoint protection

Identity protection

Rename the local Administrator account:

▼

Delivery optimization

Device restriction

Endpoint protection

Identity protection

Question #193

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription.

You plan to enable Microsoft Intune enrollment for the following types of devices:

- Existing Windows 11 devices managed by using Configuration Manager
- Personal iOS devices

The solution must minimize user disruption.

Which enrollment method should you use for each device type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows 11 devices managed by using Configuration Manager:

▼

Co-management

User enrollment

Windows Autopilot

Personal iOS devices:

▼

Apple Configurator

Automated Device Enrollment (ADE)

User enrollment

Question #194

Topic 1

You have a Windows 10 device named Device1 that is joined to Active Directory and enrolled in Microsoft Intune.

Device1 is managed by using Group Policy and Intune.

You need to ensure that the Intune settings override the Group Policy settings.

What should you configure?

A. a device configuration profile

B. a device compliance policy

C. an MDM Security Baseline profile

D. a Group Policy Object (GPO)

Question #195

Topic 1

HOTSPOT

-

You have an Azure AD Premium P2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- MDM user scope: Group1
- MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	☐	☐
User1 can enroll Device2 in Intune by using automatic enrollment.	☐	☐
User2 can enroll Device1 in Intune by using automatic enrollment.	☐	☐

Question #196

Block Office applications from creating executable content	i	Audit mode	▼
Block all Office applications from creating child processes	i	Audit mode	▼
Block Win32 API calls from Office macro	i	Audit mode	▼

You plan to deploy both profiles to devices enrolled in Microsoft Intune.

You need to identify how the following settings will be configured on the devices:

- Block Office applications from creating executable content
- Block Win32 API calls from Office macro

Currently, the settings are disabled locally on each device.

What are the effective settings on the devices? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Block Office applications from creating executable content:

Audit mode
Block
Disable
Warn

Block Win32 API calls from Office macro:

Audit mode
Block
Disable
Warn

Question #197

Topic 1

DRAG DROP

-

You have an on-premises Active Directory domain that syncs to Azure AD tenant.

The tenant contains computers that run Windows 10. The computers are hybrid Azure AD joined and enrolled in Microsoft Intune. The Microsoft Office settings on the computers are configured by using a Group Policy Object (GPO).

You need to migrate the GPO to Intune.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Assign the policy.

Create a compliance policy.

Set a scope tag to the policy.

Import an ADMX file.

Create a configuration profile.

Configure the Administrative Templates settings.

Assign the profile.

Question #198

Topic 1

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains 100 client computers that run Windows 10.

Currently, your company does NOT have a deployment infrastructure.

The company purchases Windows 11 licenses through a volume licensing agreement.

You need to recommend how to upgrade the computers to Windows 11. The solution must minimize licensing costs.

What should you include in the recommendation?

A. Windows Autopilot

B. Configuration Manager

C. subscription activation

D. Microsoft Deployment Toolkit (MDT)

Question #199

Topic 1

You have a Microsoft 365 subscription that contains a user named User1 and uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices that run Windows 11.

You need to remove User1 from the local Administrators group on all enrolled devices.

What should you configure?

A. a device compliance policy

B. an account protection policy

C. an app configuration policy

Question #200

Topic 1

HOTSPOT

-

You have computers that run Windows 10 and are configured by using Windows Autopilot.

A user performs the following tasks on a computer named Computer1:

- Creates a VPN connection to the corporate network
- Installs a Microsoft Store app named App1
- Connections to a Wi-Fi network

You perform a Windows Autopilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

The Wi-Fi connection will be:

Removed

Retained and the passphrase will be retained

Retained but the passphrase will be reset

App1 will be:

Reinstalled at sign-in

Removed

Retained

The VPN connection will be:

Removed

Retained and the credentials will be cached

Retained but the credentials will be reset

Question #201

Topic 1

HOTSPOT

-

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 11 deployment tasks.

MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 11 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 11 image without apps
Install.wim	Default Windows 11 image

You need to perform a Windows 11-place upgrade on several computers that run Windows 10.

From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

Question #202

Topic 1

You have a workgroup computer named Client1 that runs Windows 11 and connects to a public network.

You need to enable PowerShell remoting on Client1. The solution must ensure that PowerShell remoting connections are accepted from the local subnet only.

Which PowerShell command should you run?

A. Set-PSSessionConfiguration –AccessMode Local

B. Enable-PSRemoting –SkipNetworkProfileCheck

C. Enable-PSRemoting –Force

D. Set-NetFirewallRule –Name “WINRM-HTTP-In-TCP-PUBLIC” –RemoteAddress Any

Question #203

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription.

You need to enable passwordless authentication for all users. The solution must meet the following requirements:

- Users in the research department cannot use mobile devices and must authenticate from unmanaged Linux devices by using an alternative method.
- To access services, users in the sales department must authenticate by using their mobile phone.
- Administrative effort must be minimized.

Which authentication method should you use for each department? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Sales:

FIDO2 security keys
Microsoft Authenticator
Temporary Access Pass
Windows Hello for Business

Research:

FIDO2 security keys
Microsoft Authenticator
Temporary Access Pass
Windows Hello for Business
