

Question #205

Topic 1

You manage 1,000 computers that run Windows 10. All the computers are enrolled in Microsoft Intune. You manage the servicing channel settings of the computers by using Intune.

You need to review the servicing status of a computer.

What should you do?

A. From Device configuration – Profiles, view the device status.

B. From Software updates, view the Per update ring deployment state.

C. From Software updates, view the audit logs.

D. From Device compliance, view the device compliance.

Question #206

Topic 1

HOTSPOT

-

Your network contains an Active Directory domain. Active Directory is synced with Azure AD.

There are 500 Active Directory domain-joined computers that run Windows 10 and are enrolled in Microsoft Intune.

You plan to implement Microsoft Defender Exploit Guard.

You need to create a custom Microsoft Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool to use to configure the settings:

Microsoft Purview compliance portal

Windows Security app

Microsoft Intune admin center

Distribution method:

An Azure policy

An Endpoint Protection configuration profile

An Intune device compliance policy

A device restrictions configuration profile

You have a Microsoft Intune subscription associated to an Azure AD tenant named contoso.com.

Users use one of the following three suffixes when they sign in to the tenant: us.contoso.com, eu.contoso.com, or contoso.com.

You need to ensure that the users are NOT required to specify the mobile device management (MDM) enrollment URL as part of the enrollment process. The solution must minimize the number of changes.

Which DNS records do you need?

- A. one TXT record only
- B. three CNAME records
- C. three TXT records
- D. one CNAME record only

Question #208

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription.

You plan to enroll devices in Microsoft Intune that have the platforms and versions shown in the following table.

Platform	Version
Android	8,9
iOS	11,12

You need to configure device enrollment to meet the following requirements:

- Ensure that only devices that have approved platforms and versions can enroll in Microsoft Intune.
- Ensure that devices are added to Azure AD groups based on a selection made by users during the enrollment.

Which device enrollment setting should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Ensure that only devices that have approved platforms and versions can enroll in Microsoft Intune:

Android enrollment
Apple enrollment
Corporate device identifiers
Device categories
Enrollment restrictions
Windows enrollment

Ensure that devices are added to Azure AD groups based on a selection made by users during enrollment:

Android enrollment
Apple enrollment
Corporate device identifiers
Device categories
Enrollment restrictions
Windows enrollment

3/113

HOTSPOT

-

You have a Microsoft 365 tenant that uses Microsoft Intune and contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	macOS

In Microsoft Intune Endpoint security, you need to configure a disk encryption policy for each device.

Which encryption type should you use for each device, and which role-based access control (RBAC) role in Intune should you use to manage the encryption keys? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device1:

▼

FileVault
Cryptsetup
Encrypting File System (EFS)
BitLocker Drive Encryption (BitLocker)

Device2:

▼

FileVault
Cryptsetup
Encrypting File System (EFS)
BitLocker Drive Encryption (BitLocker)

RBAC role:

▼

Help Desk Operator
Application Manager
Intune Role Administrator
Policy and Profile Manager

Question #210

Topic 1

DRAG DROP

-

Your company has a Microsoft 365 E5 tenant.

All the devices of the company are enrolled in Microsoft Intune.

You need to create advanced reports by using custom queries and visualizations from raw Microsoft Intune data.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a Microsoft SharePoint Online site.

Purchase an Azure subscription.

Add diagnostic settings.

Install Microsoft Power BI Desktop.

Create a Log Analytics workspace.

Add a certificate connector to Microsoft Intune.

Answer Area

↓

Question #211

Topic 1

DRAG DROP

-

You have a Microsoft 365 subscription that uses Microsoft Defender for Endpoint.

You plan to onboard the following types of devices to Defender for Endpoint:

- macOS
- Linux Server

What should you use to onboard each device? To answer, drag the appropriate tools to the correct device types. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools

Ansible

Group Policy

Microsoft Intune

Virtual Desktop Infrastructure (VDI) scripts

Answer Area

macOS:

Linux Server:

Question #212

Topic 1

You have a Windows 10 device named Computer1 enrolled in Microsoft Intune.

You need to configure Computer1 as a public workstation that will run a single customer-facing, full-screen application.

Which configuration profile type template should you use in Microsoft Intune admin center?

A. Shared multi-user device

B. Device restrictions

C. Kiosk

D. Endpoint protection

Question #213

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage Windows 11 devices.

You create a new policy set named Set and add five device configuration profiles for Windows 10 and later.

You create a device compliance policy named Policy1.

You need to ensure that when users are assigned the device configuration profiles in Set1, they are always assigned Policy1 also.

What should you configure?

A. the assignments of Policy1

B. the Policy1 configurations

C. the assignments of Set1

D. the Set1 configurations

HOTSPOT

-

Your network contains an on-premises Active Directory domain that contains the locations shown in the following table.

Name	Internal IP address	Public Network Address Translation (NAT) IP address	Active Directory site
Location1	10.10.0.0/16	131.107.15.0/24	Site1
Location2	10.20.0.0/16	131.107.16.0/24	Site1
Location3	172.16.0.0/16	131.107.196.0/24	Site2

In Microsoft Intune, you enroll the Windows 10 devices shown in the following table.

Name	IP address
Device1	10.10.0.50
Device2	10.20.1.150
Device3	10.10.1.155
Device4	172.16.0.30

You have a Delivery Optimization device configuration profile applied to all the devices. The profile is configured as shown in the following exhibit.

From which devices can Device1 and Device2 get updates? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device1:

▼

Can get updates from Device3 only.
Cannot get updates from any device.
Can get updates from Device1 and Device3 only.
Can get updates from Device1, Device3, and Device4.

Device2:

▼

Can get updates from Device3 only.
Cannot get updates from any device.
Can get updates from Device1 and Device3 only.
Can get updates from Device1, Device3, and Device4.

Question #215

Topic 1

You have 200 computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune.

You need to enable self-service password reset on the sign-in screen.

Which settings should you configure from the Microsoft Intune admin center?

A. Device configuration

B. Device enrollment

C. Conditional access

D. Device compliance

Question #216

Topic 1

HOTSPOT -

You have a Microsoft 365 tenant that uses Microsoft Intune.

From the Microsoft Intune admin center, you plan to create a baseline to monitor the Startup score and the App reliability score of enrolled Windows 10 devices.

You need to identify which tool to use to create the baseline and the minimum number of devices required to create the baseline.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool to use:

▼

Workloads
Log Analytics
Endpoint analytics
Security baselines

Minimum number of devices:

▼

1
5
10
25

Question #217

Topic 1

You are implementing Microsoft Intune Suite.

You enroll devices in Intune as shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Windows 10
Device3	Android
Device4	iOS

The performance of which devices can be analyzed by using Endpoint analytics?

A. Device1 only

B. Device1 and Device2 only

C. Device1, Device2, and Device3 only

D. Device1, Device2, and Device4 only

E. Device1, Device2, Device3, and Device4

Question #218

Topic 1

You have the devices shown in the following table.

Name	Operating system	Domain member
Device1	Windows 11 Enterprise	No
Device2	Windows 10 Pro	Yes
Device3	Android	No
Device4	Mac OS X	No

You plan to implement Microsoft Defender for Endpoint.

You need to identify which devices can be onboarded to Microsoft Defender for Endpoint.

What should you identify?

A. Device1 only

B. Device2 only

C. Device1, Device2 only

D. Device1, Device2, and Device3 only

E. Device1, Device2, Device3, and Device4

Question #219

Topic 1

You have a Microsoft 365 subscription.

You use app protection policies to protect corporate data on Android devices.

You need to ensure that any user connecting from an Android device can only access the corporate data if they connect from an app that supports mobile application management (MAM).

What should you configure?

A. an app configuration policy

B. a Conditional Access policy

C. a device configuration profile

D. a device compliance policy

Question #220

Topic 1

Your company has a Microsoft 365 subscription.

All the users in the finance department own personal devices that run iOS or Android. All the devices are enrolled in Microsoft Intune.

The finance department adds new users each month.

The company develops a mobile application named App1 for the finance department users.

You need to ensure that only the finance department users can download App1.

What should you do first?

A. Register App1 in Azure AD.

B. Add App1 to the vendor stores for iOS and Android applications.

C. Add App1 to a Microsoft Deployment Toolkit (MDT) deployment share.

D. Add App1 to Intune.

DRAG DROP

-

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform	Enrolled in Microsoft Intune
Device1	Windows 10	Yes
Device2	Android Enterprise	Yes
Device3	iOS/iPadOS	Yes

You need to configure the Microsoft Edge settings for each device.

What should you use? To answer, drag the appropriate Intune features to the correct devices. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Intune Features

App configuration policy

Device configuration profile

Endpoint security policy

Answer Area

Device1:

Device2:

Device3:

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. The subscription contains the users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group2
User3	Group3

Group2 and Group3 are members of Group1.

All the users use Microsoft Excel.

From the Microsoft Intune admin center, you create the policies shown in the following table.

Name	Type	Priority	Assigned to	Default file format for Excel
Policy1	Policies for Office apps	0	Group1	OpenDocument Spreadsheet(*.ods)
Policy2	Policies for Office apps	1	Group2	Excel Binary Workbook(*.xlsb)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 saves a new spreadsheet, the .ods format is used.	☐	☐
When User2 saves a new spreadsheet, the .xlsb format is used.	☐	☐
When User3 saves a new spreadsheet, the .xlsx format is used.	☐	☐

Question #223

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription that contains a computer named Computer1 that runs Windows 11. Computer1 is enrolled in Microsoft Intune.

You need to deploy an app named App1 to Computer1. The App1 installation will use multiple files.

What should you use to package App1, and which file format will be used? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Use:

Deployment Image Servicing and Management (DISM)

Microsoft Application Virtualization (App-V) Sequencer

Win32 Content Prep Tool

Windows Package Manager

File format:

.apk

.appv

.intunewin

.ipa

Question #224

Topic 1

You have a Microsoft 365 tenant that contains the devices shown in the following table.

Name	Member of
Device1	Group1
Device2	Group1
Device3	Group1

The devices are managed by using Microsoft Intune.

You create a compliance policy named Policy1 and assign Policy1 to Group1. Policy1 is configured to mark a device as Compliant only if the device security settings match the settings specified in the policy.

You discover that devices that are not members of Group1 are shown as Compliant.

You need to ensure that only devices that are assigned a compliance policy can be shown as Compliant. All other devices must be shown as Not compliant.

What should you do from the Microsoft Intune admin center?

A. From Device compliance, configure the Compliance policy settings.

B. From Endpoint security, configure the Conditional access settings.

C. From Tenant administration, modify the Diagnostic settings.

D. From Policy1, modify the actions for noncompliance.

Question #225

Topic 1

HOTSPOT

-

Your company has an infrastructure that has the following:

- A Microsoft 365 tenant
- An Active Directory forest
- Microsoft Intune
- A Key Management Service (KMS) server
- A Windows Deployment Services (WDS) server
- An Azure AD Premium tenant

The company purchases 100 new client computers that run Windows.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows Autopilot.

What should you use? To answer, select the appropriate options in the answer area,

NOTE: Each correct selection is worth one point.

Answer Area

Management tool:

Microsoft Entra admin center
Microsoft Intune admin center
Volume Activation Management Tool console
Windows Deployment Services console

Required information from each computer:

Device serial number and hardware hash
MAC address and computer name
Volume License Key and computer name

Question #226

Topic 1

You have an Azure AD tenant named contoso.com.

You plan to purchase 25 computers that run Windows 11. You plan to deliver the computers directly to users.

You need to ensure that during the out-of-box experience (OBE), users are prompted to sign in, and then the computers are configured to use Microsoft Intune.

Which two components should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. a provisioning package

B. automatic enrollment

C. an unattend.xml answer file

D. a Windows Autopilot deployment profile for self-deploying mode

E. a Windows Autopilot deployment profile for user-driven mode

Question #227

Topic 1

You need to assign the same deployment profile to all the computers that are configured by using Windows Autopilot.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Create an Azure AD group that has dynamic membership rules and uses the ZTDID tag.

B. Create an Azure AD group that has dynamic membership rules and uses the operatingSystem tag.

C. Assign a Windows Autopilot deployment profile to a group.

D. Join the computers to Azure AD.

E. Create a Group Policy object (GPO) that is linked to a domain.

F. Join the computers to an on-premises Active Directory domain.

Question #228

Topic 1

DRAG DROP

-

You have a Microsoft Deployment Toolkit (MDT) deployment share that has a path of D:\MDTShare.

You need to add a feature pack to the boot image.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Copy the feature pack to D:\MDTShare\Tools\x86.

Copy the feature pack to D:\MDTShare\Packages.

Modify the Windows PE properties of the deployment share.

Modify the General properties of the deployment share.

Update the deployment share.

Answer Area

↓

Question #229

Topic 1

You plan to deploy Windows 11 Pro to 200 new computers by using the Microsoft Deployment Toolkit (MDT) and Windows Deployment Services (WDS).

The company has a Volume Licensing Agreement and uses a product key to activate Windows 11.

You need to ensure that the new computers will be configured to have the correct product key during the installation.

What should you configure?

A. an MDT task sequence

B. the Device settings in Azure AD

C. a WDS boot image

D. a Windows Autopilot deployment profile

Question #230

Topic 1

HOTSPOT -

You manage a Microsoft Deployment Toolkit (MDT) deployment share named DS1. DS1 contains an Out-of-Box Drivers folder named Windows 11 x64 that has subfolders in the format of {make name}\{model name}.

You need to modify a deployment task sequence to ensure that all the drivers in the folder that match the make and model of the computers are installed without using PnP detection or selection profiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Phase that you must modify in the deployment task sequence:

▼

Install

Preinstall

Validation

Task that you must use to specify which folder contains the drivers:

▼

Gather

Inject Drivers

Set Task Sequence Variable

Validate

<https://www.examtopics.com/exams/microsoft/md-102/custom-view/>

17/113

HOTSPOT

-

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 11.

You need to modify the deployment share to meet the following requirements:

- Ensure that the user who performs the installation is prompted to set the local Administrator password
- Define a rule for how to name computers during the deployment.

The solution must NOT replace the existing WinPE image.

Which file should you modify for each requirement? To answer, select the appropriate options in the answer area,

NOTE: Each correct selection is worth one point.

Answer Area

Administrator password:

Bootstrap.ini
CustomSettings.ini
Settings.ini
System.ini

Computer names:

Bootstrap.ini
CustomSettings.ini
Settings.ini
System.ini

Question #232

Topic 1

HOTSPOT

-

You have an Azure AD tenant that contains the following:

- Windows 11 devices that are joined to Azure AD
- A user that has a display name of User1 and a UPN of user1@contoso.com

You enable Remote Desktop on the Windows 11 devices.

You need to ensure that User1 can use Remote Desktop to connect to the devices.

How should you complete the command that must be run on each device? To answer, select the appropriate options in the answer area

NOTE: Each correct selection is worth one point.

Answer Area

net localgroup

Question #233

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	RAM	Storage	TPM version
Device1	14 GB	256 GB	1.2
Device2	4 GB	64 GB	2.0
Device3	8 GB	128 GB	2.0

All the devices will be reimaged and licensed by using subscription activation.

The devices are assigned to the users shown in the following table.

Name	Device	License
User1	Device1	Microsoft 365 E5
User2	Device2	Microsoft 365 E3
User3	Device3	Office 365 E5, Enterprise Mobility + Security E5

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 can be upgraded to Windows 11 and activated.	☐	☐
Device2 requires additional hardware before it can be upgraded to Windows 11.	☐	☐
User3 requires an additional license to activate Windows 11 on Device3.	☐	☐

Question #234

Topic 1

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers.

You have a computer named Computer1 that runs Windows 10.

From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers.

You need to ensure that you can run the PowerShell commands on the finance department computers from Computer.

What should you do on the finance department computers?

A. From Windows PowerShell, run the Enable-MMAgent cmdlet.

B. From the local Group Policy, enable the Allow Remote Shell Access setting.

C. From Windows PowerShell, run the Enable-PSRemoting cmdlet.

D. From the local Group Policy, enable the Turn on Script Execution setting.

Question #235

Topic 1

You have a Microsoft 365 subscription that includes Microsoft Intune.

You plan to use Windows Autopilot to deploy Windows 11 devices.

You need to meet the following requirements during Autopilot provisioning:

- Display the app and profile configuration progress.
- Block users from using the devices until all apps and profiles are installed

What should you configure?

A. an app configuration policy

B. an app protection policy

C. an enrollment device platform restriction

D. an enrollment status page

Question #236

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription. The subscription contains 1,000 computers that run Windows 11 and are enrolled in Microsoft Intune.

You plan to create a compliance policy that has the following options enabled:

- Require Secure Boot to be enabled on the device.
- Require the device to be at or under the machine risk score.

Which two Compliance settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows 10/11 compliance policy

Question #237

Topic 1

Your network contains an Active Directory domain named contoso.com. The domain contains 25 computers that run Windows 11.

You have a Microsoft 365 subscription

You have an Azure AD tenant that syncs with contoso.com.

You configure hybrid Azure AD join and discover that some of the computers have a registered state of Pending.

You need to ensure that the computers complete the join successfully.

What should you ensure?

A. that Windows is activated on all the computers

B. that the users of the computers are assigned Microsoft 365 licenses

C. that each computer has a line of sight to a domain controller

D. that the computers contain the latest quality updates

Question #238

Topic 1

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows
Device2	Android
Device3	iOS
Device4	macOS

For which devices can you manage updates by using Intune?

A. Device1 only

B. Device1 and Device2 only

C. Device1 and Device3 only

D. Device1, Device3, and Device4 only

E. Device1, Device2, Device3, and Device4

You have 500 computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune.

You plan to distribute certificates to the computers by using Simple Certificate Enrollment Protocol (SCEP).

You have the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Root certification authority (CA)
Server3	Subordinate certification authority (CA)
Server4	Network Device Enrollment Service (NDES)

NDES issues certificates from the subordinate CA.

You are configuring a device configuration profile as shown in the exhibit. (Click the Exhibit tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If you reset Device1, the device will be deployed by using Autopilot.	☐	☐
If you reset Device2, the device will be deployed by using Autopilot.	☐	☐
If you restart Device3, the device will be deployed by using Autopilot.	☐	☐

HOTSPOT

-

You have the Microsoft Deployment Toolkit (MDT) installed in three sites as shown in the following table.

MDT instance name	Site	Default gateway
MDT1	New York	10.1.1.0/24
MDT2	London	10.5.5.0/24
MDT3	Dallas	10.4.4.0/24

You use Distributed File System (DFS) Replication to replicate images in a share named Production.

You configure the following settings in the Bootstrap.ini file.

```
[Settings]
Priority=DefaultGateway, Default

[DefaultGateway]
10.1.1.1=NewYork
10.5.5.1=London

[NewYork]
DeployRoot=\\MDT1\Production$

[London]
DeployRoot=\\MDT2\Production$
KeyboardLocale=en-gb

[Default]
DeployRoot=\\MDT3\Production$
KeyboardLocale=en-us
```

You plan to deploy Windows 10 to the computers shown in the following table.

Name	IP address
LT1	10.1.1.240
DT1	10.5.5.115
TB1	10.2.2.193

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
TB1 will download the image from MDT3.	☐	☐
DT1 will have a KeyboardLocale of en-gb.	☐	☐
LT1 will download the image from MDT1.	☐	☐

Question #246

Topic 1

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft Intune.

You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Android Enterprise system app

B. Web link

C. Android store app

D. Managed Google Play store app

E. Built-in Android app

Question #247

Topic 1

You have a Microsoft 365 subscription.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Android
Device3	iOS
Device4	Ubuntu Linux

To which devices can you deploy apps by using Intune?

A. Device1 only

B. Device1 and Device2 only

C. Device1 and Device3 only

D. Device1, Device2, and Device3 only

E. Device1, Device2, Device3, and Device4

Question #248

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. The subscription contains the resources shown in the following table.

Name	Type	Member of
User1	User	Group1
Device1	Device	Group2

User1 is the owner of Device1.

You deploy Microsoft 365 Apps Windows 10 and later app types to Intune as shown in the following table.

Name	Shows in Company Portal	Microsoft Office app to install	Assignment	Time of creation
App1	Yes	Word	Group1 – Required	10:00 AM
App2	Yes	Excel	Group2 – Required	10:30 AM
App3	Yes	PowerPoint	Group1 – Available	11:00 AM

The next day you review the results of the app deployments.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
App1 shows in the Company Portal.	☐	☐
Word is installed on Device1.	☐	☐
Excel is installed on Device1.	☐	☐

HOTSPOT

-

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Intune to manage devices.

You need to assess device performance during startup and identify any device models that take longer than average to start.

What should you use to assess the device performance, and which portal should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Use:

▼

Compliance policies
Device diagnostics
Endpoint analytics

In portal:

▼

Microsoft 365 Apps admin center
Microsoft Entra admin center
Microsoft Intune admin center

Question #250

Topic 1

DRAG DROP

-

Your on-premises network contains an Active Directory Domain Services (AD DS) domain.

You have an Azure subscription that contains a virtual network named VNet1. VNet1 contains five virtual machines and is NOT connected to the on-premises network.

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You purchase Windows 365 Enterprise licenses.

You need to deploy Cloud PC. The solution must meet the following requirements:

- All users must be able to access their Cloud PC at any time without any restrictions.
- The users must be able to connect to the virtual machines on VNet1.

How should you configure the provisioning policy for Windows 365? To answer, drag the appropriate options to the correct settings. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Question #251

Topic 1

HOTSPOT

-

Your network contains an Active Directory domain.

The domain contains four computers named Computer1, Computer2, Computer3, and Computer4 that run Windows 10.

You perform the following actions:

- On Computer1, you install Windows Admin Center and configure Windows Defender Firewall to allow incoming communication over TCP ports 80,443, and 6516.
- On Computer2, you run the Enable-PSRemoting cmdlet.
- On Computer3, you configure Windows Defender Firewall to allow Windows Remote Management (WinRM) traffic.
- On Computer4, you run the winrm quickconfig command.

You need to manage the computers remotely by using Windows Admin Center.

From which computers can you connect to Windows Admin Center, and which computers can you manage by using Windows Admin Center? To answer, select the appropriate options in the answer are.

NOTE: Each correct selection is worth one point.

Answer Area

Connect from:

▼

Computer1 only
Computer1 and Computer2 only
Computer1 and Computer3 only
Computer1, Computer2, Computer3, and Computer4

Manage:

▼

Computer1 only
Computer1 and Computer2 only
Computer1 and Computer3 only
Computer1, Computer2, and Computer4 only
Computer1, Computer2, Computer3, and Computer4

Question #252

Topic 1

You have a Hyper-V host. The host contains virtual machines that run Windows 10 as shown in following table.

Name	Generation	Virtual TPM	Virtual processors	Memory
VM1	1	No	4	16 GB
VM2	2	Yes	2	4 GB
VM3	2	Yes	1	8 GB

Which virtual machines can be upgraded to Windows 11?

A. VM1 only

B. VM2 only

C. VM2 and VM3 only

D. VM1, VM2, and VM3

Question #253

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Intune to manage all device.

Users have iOS devices with Microsoft apps installed.

You need to prevent users from cutting, copying, and pasting data between Microsoft Excel and other apps installed on the devices.

What should you configure?

A. an app protection policy

B. an app configuration policy

C. an iOS app provisioning profile

D. policies for Microsoft Office apps

Question #254

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Intune to manage devices.

You need to review details about device wipes initiated through Intune.

Which report should you review?

A. Noncompliant devices

B. Assignment status

C. Windows health attestation report

D. Device actions

Question #255

Topic 1

You have a Microsoft 365 subscription. The subscription contains 500 computers that run Windows 11 and are enrolled in Microsoft Intune.

You need to manage the deployment of monthly security updates. The solution must meet the following requirements:

- Updates must be deployed to a group of test computers for quality assurance.
- Updates must be deployed automatically 15 days after the quality assurance testing.

What should you create in the Microsoft Intune admin center?

A. a device configuration profile

B. a feature update policy

C. a security baseline

D. an update ring

Question #256

Topic 1

HOTSPOT

-

Your company has computers that run Windows 10 and are Microsoft Entra joined.

The company purchases an Azure subscription.

You need to collect Windows events from the Windows 10 computers in Azure. The solution must enable you to create alerts based on the collected events.

What should you create in Azure and what should you configure on the computers? To answer, select the appropriate options in the answer area.

Answer Area

Resource to create in Azure:

An Azure event hub
An Azure Log Analytics workspace
An Azure SQL database
An Azure Storage account

Configuration to perform on the computers:

Configure the Event Collector service
Create an event subscription
Install the Azure Monitor Agent

Question #257

Topic 1

You have a Microsoft 365 subscription that contains 500 computers that run Windows 11. The computers are Azure AD joined and are enrolled in Microsoft Intune.

You plan to manage Microsoft Defender Antivirus on the computers.

You need to prevent users from disabling Microsoft Defender for Endpoint.

What should you do?

A. From the Microsoft Intune admin center, create an attack surface reduction (ASR) policy.

B. From the Microsoft 365 Defender portal, enable tamper protection.

C. From the Microsoft Intune admin center, create an account protection policy.

D. From the Microsoft Entra admin center, create a Conditional Access policy.

<https://www.examtopics.com/exams/microsoft/md-102/custom-view/>

38/113

Question #258

Topic 1

You have a Microsoft 365 subscription that has Windows 365 Enterprise licenses.

You plan to use a custom Windows 11 image as a template for Cloud PCs.

You have a Hyper-V virtual machine that runs Windows 11 and has the following configurations:

- Name: VM1
- Disk size: 64 GB
- Disk format: VHDX
- Disk type: Fixed size
- Generation: Generation 2

You need to ensure that you can use VM1 as a source for the custom image.

What should you do on VM1 first?

A. Change the disk type to Dynamically expanding.

B. Change the disk format to the VHD.

C. Change the generation to Generation 1.

D. Increase the disk size.

Question #259

Topic 1

HOTSPOT

-

Your on-premises network contains an Active Directory domain named contoso.com. The domain contains a user account named Admin1 and the resources shown in the following table.

Name	Type
Server1	Computer object
OU1	Organizational unit (OU)

You have a Microsoft 365 E5 subscription.

You have a Microsoft Entra tenant that syncs with contoso.com.

Admin1 plans to use Windows Autopilot to deploy 100 Windows 11 devices. The deployment must meet the following requirements:

- The devices must be Microsoft Entra hybrid joined during the deployment.
- Computer objects must be created in OU1.

You need to configure Server1 and Active Directory delegation to support the deployment.

NOTE: Each correct selection is worth one point.

Answer Area

Server1:

Enroll in Microsoft Intune.
Export the hardware hash and upload the hash to Microsoft Intune.
Install the Intune Connector for Active Directory.

Resource:

Admin1
OU1
Server1

Question #260

Topic 1

You have a Microsoft 365 subscription.

Each user is assigned a Windows 365 Enterprise license.

You need to deploy Cloud PCs that will be Microsoft Entra hybrid joined.

What should you do first?

A. Create an Azure network connection (ANC).

B. Create a provisioning policy.

C. Create a configuration profile in Microsoft Intune.

D. Upload a custom image.

Your on-premises network contains an Active Directory Domain Services (AD DS) domain named contoso.com.

The domain contains a domain controller named dc1.contoso.com.

You have a Microsoft 365 E5 subscription that uses Microsoft Intune Suite.

You have an Azure subscription that contains the resources shown in the following table.

Name	Description
LNG1	Local network gateway that uses the public IP address of the local infrastructure
GW1	Virtual network gateway
GW2	Virtual network gateway
CN1	Site-to-Site (S2S) VPN connection that connects LNG1 and GW1

The subscription contains the virtual networks shown in the following table.

Name	IP address space	Subnet	DNS configuration	Virtual network gateway
VNet1	192.168.10.0/24	192.168.10.0/26	dc1.contoso.com	GW1
VNet2	192.168.11.0/24	192.168.11.0/26	Azure DNS	None
VNet3	192.168.12.0/24	192.168.12.0/26	Azure DNS	GW2

You plan to deploy Windows 365 Enterprise Cloud PC.

You need to create an Azure network connection (ANC) that will use Microsoft Entra hybrid join.

Which virtual network can you use for the ANC?

- A. VNet1 only
- B. VNet2 only
- C. VNet3 only
- D. VNet1 and VNet2
- E. VNet1 and VNet3

Question #262

Topic 1

DRAG DROP

-

You have a Microsoft 365 E5 subscription that includes Microsoft Intune.

The subscription contains Android Enterprise devices that are enrolled in Intune and have personally-owned work profiles. All the Android devices are members of a group named Group1.

You need to ensure that end users and Intune administrators receive an email message when an Android device does NOT have an up-to-date security provider.

Which actions should you perform from the Microsoft Intune admin center in sequence? To answer, drag the appropriate actions to the correct order. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions

Create a compliance policy.

Create a Conditional Access policy.

Create an attack surface reduction (ASR) policy.

From Compliance policies, create a notification message template.

From Tenant admin, create a custom notification.

Answer Area

Step 1:

Step 2:

Step 3: Assign policy to Group1.

Question #263

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription.

You have 25 Microsoft Surface Hub devices that you plan to manage by using Microsoft Intune.

You need to configure the devices to meet the following requirements:

- Enable Windows Hello for Business.
- Configure Microsoft Defender SmartScreen to block users from running unverified files.

Which profile type template should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows Hello for Business:

Device restrictions

Device restrictions (Windows 10 Team)

Endpoint protection

Identity protection

Microsoft Defender for Endpoint (Desktop devices running Windows 10 or later)

Microsoft Defender SmartScreen:

Windows health monitoring

Device restrictions (Windows 10 Team)

Endpoint protection

Identity protection

Microsoft Defender for Endpoint (Desktop devices running Windows 10 or later)

HOTSPOT

-

You have a Microsoft 365 E5 subscription that contains the security groups shown in the following table.

Name	Membership type	Membership rule
Group1	Assigned	<i>Not applicable</i>
Group2	Dynamic	(device.deviceOSType -eq "Windows")
Group3	Dynamic	(extensionAttribute1 -eq "Test")

The subscription contains devices that run Windows 11, version 21H2 as shown in the following table.

Name	extensionAttribute1	Member of Group1
Device1	Test	No
Device2	<i>None</i>	No
Device3	<i>None</i>	Yes

You have a feature update deployment profile named Deployment1 as shown in the following table.

Setting	Value
Feature update to deploy	Windows 11, version 22H2
Rollout options	Make update available as soon as possible
Included groups	Group2
Excluded groups	Group1, Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 will be upgraded to Windows 11, version 22H2.	☐	☐
Device2 will be upgraded to Windows 11, version 22H2.	☐	☐
Device3 will be upgraded to Windows 11, version 22H2.	☐	☐

HOTSPOT

-

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to ensure that users can only enroll devices that meet the following requirements:

- Android devices that support the use of work profiles.
- iOS devices that run iOS 11.0 or later.

Which two restrictions should you modify? To answer, select the restrictions in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Home > Devices > Enroll devices > All Users >

Edit restriction

Device type restriction

1 Platform settings

2 Review + save

Specify the platform configuration restrictions that must be met for a device to enroll. Use compliance policies to restrict devices after enrollment. Define versions as major.minor.build. Version restrictions only apply to devices enrolled with the Company Portal. Intune classifies devices as personally-owned by default. Additional action is required to classify devices as corporate-owned. [Learn more.](#)

Type	Platform	versions	Personally owned	Device manufacturer

Question #266

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Intune to manage Windows 11 devices.

You need to implement Windows Local Administrator Password Solution (Windows LAPS).

What should you configure?

A. a configuration profile

B. an account protection policy

C. an app protection policy

D. a device compliance policy

Question #267

Topic 1

You have a Microsoft 365 subscription that contains 500 computers that run Windows 11. The computers are Microsoft Entra joined and are enrolled in Microsoft Intune.

You plan to manage Microsoft Defender for Endpoint on the computers.

You need to prevent users from disabling Microsoft Defender for Endpoint.

What should you do?

A. From the Microsoft Intune admin center, create a security baseline.

B. From the Microsoft Intune admin center, create an antivirus policy.

C. From the Microsoft Entra admin center, create a Conditional Access policy.

D. From the Microsoft Intune admin center, create a device compliance policy.

Question #268

Topic 1

You have a Microsoft 365 subscription that includes Microsoft Intune.

You need to deploy a custom app to Android devices. The app uses the APK file format.

Which type of app should you select for the deployment?

A. built-in

B. Android store

C. Managed Google Play

D. line-of-business (LOB)

E. web link

Question #269

Topic 1

You have a Microsoft 365 E5 subscription.

You use Microsoft Intune to manage all devices.

You need to prepare a Win32 app named App1.exe for deployment.

What should you do first?

A. From the Microsoft Intune admin center, create an app configuration policy.

B. Change App1.exe to the INTUNEWIN format.

C. From the Microsoft 365 Apps admin center, create a deployment configuration.

D. Upload App1.exe to Azure Blob Storage.

Question #270

Topic 1

You have a Microsoft 365 E5 subscription that includes Microsoft Intune.

For macOS devices, you create an update policy named Policy1 that has the following settings:

• All other updates (OS, built-in apps): Download and install

• Assignments:

• Included groups: All Devices

Which two types of updates can be downloaded and installed by using Policy1? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. configuration file

B. macOS

C. firmware

D. critical

E. built-in app

Question #271

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription that includes Microsoft Intune. The subscription contains a group named Group1. Group1 contains devices enrolled in Intune.

You deploy Remote Help in Intune.

You need to configure Remote Help to only allow support administrators to join Remote Help sessions from the devices in Group1.

Which type of Microsoft Entra object should you create, and which type of policy should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft Entra object:

A service principal
An app registration
An enterprise application

Policy:

Compliance
Conditional Access
Endpoint Privilege Management

Question #272

Topic 1

You have a Microsoft 365 E5 subscription that includes Microsoft Intune and contains a user named Admin1.

Admin1 must use the Microsoft Intune admin center to perform the following tasks:

- Create and assign apps and policies to users and devices by using Intune.
- Create, assign, and delete Windows 365 Cloud PC provisioning policies.

You need to assign the required roles to Admin1. The solution must meet the following requirements:

- Follow the principle of least privilege.
- Minimize administrative effort.

What should you do?

A. Assign Admin1 the Help Desk Operator role.

B. Assign Admin1 the Cloud PC Reader role.

C. Assign Admin1 the Cloud PC Administrator role.

D. Create a custom Microsoft Entra role and assign the role to Admin1.

E. Create a custom Intune role and assign the role to Admin1.

Question #273

Topic 1

You have a Microsoft 365 subscription that includes Microsoft Intune. The subscription contains Windows 11 devices enrolled in Intune. The subscription contains three groups named Departement1, Department2, and Department3.

You need to deploy Microsoft 365 Apps to the Windows 11 devices. The solution must meet the following requirements:

- Users in Department1 and Department2 must receive the full Microsoft 365 Apps suite, including Microsoft Project and Visio.
- Users in Department3 must receive the full Microsoft 365 Apps suite, including Microsoft Project, but without Visio.
- All other users must receive the full Microsoft 365 Apps suite without Microsoft Project or Visio.

What is the minimum number of deployments you should create?

A. 1

B. 2

C. 3

D. 4

Question #274

Topic 1

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You configure Intune to send log data to Log Analytics.

You need to review events involving devices that fail to enroll in Intune.

What should you monitor?

A. operational logs

B. audit logs

C. the Intune Device log

D. device compliance organizational logs

Question #275

Topic 1

You have a Microsoft 365 subscription that includes Microsoft Intune. The subscription contains corporate-owned, fully managed Android Enterprise devices.

You plan to deploy a configuration profile that will have a device restrictions profile type named Profile1. Profile1 will assign maintenance windows for system updates.

What should you configure from the Configuration settings for Profile1?

A. Device experience

B. General

C. Connectivity

D. Power Settings

Question #276

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription.

You use Microsoft Intune to manage Windows 365 Cloud PC devices.

You need to deploy a Windows 365 Security Baseline to the Cloud PC devices. The solution must meet the following requirements:

- Block data execution prevention.
- Enable virtualization-based security (VBS) and Secure Boot.

What should you configure for the Windows 365 Security Baseline profile? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To block data execution prevention:

File Explorer
Microsoft Defender
Microsoft Edge

To enable VBS:

Device Guard
Microsoft Defender
System

Question #277

Topic 1

You have a Microsoft 365 subscription that includes Microsoft Intune.

You create a new Android app protection policy named Policy1 that prevents screen captures in all Microsoft apps.

You discover that an unmanaged email client installed on Android devices can still capture screens.

You need to ensure that users can only use Microsoft apps to access email.

What should you do?

A. Create a Conditional Access policy.

B. Create a compliance policy.

C. Modify the Data protection settings of Policy1.

D. Modify the assignments of Policy1.

Question #278

Topic 1

You have a Microsoft 365 E5 subscription.

All Windows devices are enrolled in Microsoft Intune.

You need to create an app protection policy named Policy1 and apply Policy1 to the devices.

What can you protect by using Policy1?

A. Microsoft Outlook

B. Microsoft OneDrive

C. Microsoft Teams

D. Microsoft Edge

Question #279

Topic 1

You have a Microsoft 365 E5 subscription.

You use Microsoft Intune to manage all Windows 11 devices.

You create an attack surface reduction (ASR) policy named Profile1 based on the Attack Surface Reduction Rules profile and assign Profile1 to all the devices.

A user reports that an Adobe Reader plug-in is now blocked.

You need to ensure that the plug-in is unblocked.

What should you do?

A. Create an Endpoint Privilege Management policy and assign the policy to all the devices.

B. Add a scope tag to Profile1.

C. Configure ASR Only Per Rule Exclusions in Profile1.

D. Create a device compliance policy and assign the policy to all the devices.

Question #280

Topic 1

You have a Microsoft 365 E5 subscription.

All devices are enrolled in Microsoft Intune.

You need to ensure that devices that have NOT checked in for 30 days are deleted from Intune.

What should you configure from the Microsoft Intune admin center?

A. a device limit restriction

B. automatic enrollment

C. a device clean-up rule

D. a configuration profile

Question #281

Topic 1

You have a Microsoft 365 E5 subscription.

All devices are enrolled in Microsoft Intune.

You create a Conditional Access policy named Policy1 that requires multifactor authentication (MFA).

You need to ensure that Policy1 only applies to devices marked as noncompliant.

Which settings of Policy1 should you configure?

A. Device platforms under Conditions

B. Filter for devices under Conditions

C. Target resources

D. Grant

E. Session

HOTSPOT

Question #283

Topic 1

HOTSPOT

-

You have a Microsoft 365 tenant that uses Microsoft Intune to manage the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	Android Enterprise
Device4	iOS
Device5	iPadOS

You need to deploy a compliance solution that meets the following requirements:

- Marks the devices as Not Compliant if they do not meet compliance policies
- Remotely locks noncompliant devices

What is the minimum number of compliance policies required, and which devices support the remote lock action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Minimum number of compliance policies required:

▼

1

2

3

4

5

Devices that support the remote lock action:

▼

Device1 only

Device2 and Device3 only

Device4 and Device5 only

Device2, Device3, Device4, and Device5

Device1, Device2, Device3, Device4, and Device5

HOTSPOT

-

Your network contains an on-premises Active Directory Domain Services (AD DS) domain.

You have a Microsoft 365 E5 subscription that includes Microsoft Intune and syncs with the AD DS domain.

Windows Local Administrator Password Solution (Windows LAPS) is enabled in Microsoft Entra ID.

The subscription has the custom roles shown in the following table.

Name	Permission
Role1	microsoft.directory/deviceLocalCredentials/password/read
Role2	microsoft.directory/deviceLocalCredentials/standard/read
Role3	microsoft.directory/deviceLocalCredentials/standard/read microsoft.directory/deviceLocalCredentials/password/read

Microsoft Entra contains the users shown in the following table.

Name	Built-in role	Assigned custom roles
User1	Helpdesk Administrator	Role1
User2	Security Reader	Role2
User3	None	Role3

You have the devices shown in the following table.

Name	Domain Join Type
Device1	Joined to AD DS
Device2	Microsoft Entra hybrid joined
Device3	Microsoft Entra joined

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can use Microsoft Entra to read the local administrator password of Device1.	☐	☐
User2 can use Microsoft Entra to read the local administrator password of Device2.	☐	☐
User3 can use Microsoft Entra to read the local administrator password of Device3.	☐	☐

Question #285

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription and use Microsoft Intune.

You purchase 50 Windows devices.

You configure automatic enrollment to Intune for Microsoft Entra joined devices.

You need to use a provisioning package to join the devices to Microsoft Entra.

What should you use to create the provisioning package, and what is the maximum amount of time you can use the package for bulk enrollment?
To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Use:

Intune Company Portal
Microsoft Deployment Toolkit (MDT)
Windows Configuration Designer
Windows Setup

Maximum amount of time:

30 days
90 days
180 days
365 days

Question #286

Topic 1

You have a Microsoft 365 E5 subscription.

You need to configure the automated investigation and response (AIR) remediation level for a device named Device1 to require approval for all folders.

What should you create?

A. a security group

B. a device group

C. an administrative unit

D. an action group

Question #287

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription.

You need to route Microsoft Intune logs to an Azure resource that supports the use of visuals, monitoring, and alerting.

Which settings should you configure in Intune, and which resource should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Settings:

Connectors and tokens

Device diagnostics

Diagnostic settings

Intune add-ons

Resource:

A Log Analytics workspace

An Azure logic app

A storage account

A virtual machine

Question #288

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription that includes Microsoft Intune.

You need to configure a compliance policy for the iOS/iPadOS platform. The solution must meet the following requirements:

- Require jailbroken devices to be marked as noncompliant.
- Mark devices without a password lock as noncompliant.

Which compliance policy settings should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Require jailbroken devices to be marked as noncompliant:

Device Health

Device Properties

System Security

Require a password to unlock mobile devices:

Device Health

Device Properties

System Security

Question #289

Topic 1

You have a Microsoft Intune subscription.

You have devices enrolled in Intune as shown in the following table.

Name	Operating system
Device1	Android 11
Device2	Android 12.1
Device3	iOS 12.3.1
Device4	iOS 12.3.2
Device5	iOS 13.5

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage App1?

A. 1

B. 2

C. 3

D. 4

E. 5

Question #290

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription. All devices are enrolled in Microsoft Intune.

You have a device group named Group1 that contains five Windows 11 devices.

You need to ensure that the devices in Group1 automatically receive new Windows 11 builds before the builds are released to the public.

What should you configure in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Profile type:

Feature updates for Windows 10 and later

Quality updates for Windows 10 and later

Update rings for Windows 10 and later

Prerelease channel:

Beta Channel

Dev Channel

Windows Insider - Release Preview

Question #291

Topic 1

HOTSPOT

-

You have a Microsoft 365 E5 subscription and use Microsoft Intune. The subscription contains a Microsoft Entra tenant that syncs with an on-premises Active Directory Domain Services (AD DS) domain. The tenant has Windows Local Administrator Password Solution (Windows LAPS) enabled.

You have the Windows devices shown in the following table.

Name	Join type	Enrolled in Intune
Device1	Joined to the AD DS domain	Yes
Device2	Microsoft Entra hybrid joined	Yes
Device3	Microsoft Entra joined	No

You have an Endpoint security policy that is configured as shown in the following table.

Setting	Value
Name	Policy1
Platform	Windows 10 and later
Profile	Local admin password solution (Windows LAPS)
Backup Directory	Backup the password to Azure AD only
Password Age Days	30
Assignments	Include: All devices

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
The local administrator password of Device1 will be reset every 30 days.	☐	☐
The local administrator password of Device2 will be recoverable from Microsoft Entra ID.	☐	☐
The local administrator password of Device3 will be reset every 30 days.	☐	☐

Question #292

Topic 1

You have a Microsot Entra tenant named contoso.com.

You have a workgroup computer named Computer1 that runs Windows 11.

You need to add Computer1 to contoso.com.

What should you use?

A. the Settings app

B. Computer Management

C. netdom.exe

Question #293

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription that includes Microsoft Intune.

From the Microsoft Intune admin center, you add the apps shown in the following table.

Name	Type	Operating system
App1	Microsoft 365 Apps for Windows 10 and later	Windows 10 and later
App2	Line-of-business (LOB) app	Android

You need to configure the apps to meet the following requirements:

- App1 must automatically install for all users in the marketing department on any Windows 11 device enrolled in Intune. If a user receives a new device, App1 must install automatically.
- App2 must be available for download for any user in the HR department from a personal Android device that is not enrolled in Intune.

Which assignment should you configure for each app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

App1:

A Required assignment to a device group

A Required assignment to a user group

An Available assignment to a device group

An Available assignment to a user group

App2:

A Required assignment to a device group

A Required assignment to a user group

An Available assignment to a device group

An Available assignment to a user group

Question #294

Topic 1

You have a Microsoft 365 Business Standard subscription and 100 Windows 10 Pro devices that are joined to Microsoft Entra.

You purchase Microsoft 365 E5 licenses for all users.

You need to upgrade the Windows 10 Pro devices to Windows 10 Enterprise. The solution must minimize administrative effort.

Which upgrade method should you use?

A. a Microsoft Deployment Toolkit (MDT) lite-touch deployment

B. Subscription Activation

C. an in-place upgrade by using Windows installation media

D. Windows Autopilot

Question #295

Topic 1

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in Microsoft Intune.

You need to deploy the Microsoft 365 Apps for enterprise suite to all the computers.

What should you do?

A. From the Microsoft Intune admin center, add an app.

B. From the Microsoft Intune admin center, create a Windows 10 and later device profile.

C. From the Microsoft Entra admin center, add an enterprise application.

D. From the Microsoft Entra admin center, add an app registration.

Question #296

Topic 1

You have a Microsoft 365 E5 subscription.

You have a Windows device named Device1 that is enrolled in Microsoft Intune.

On January 1,2024, you assign an app named App1 to Device1 as a required app.

The install of App1 fails.

What is the next date that Intune will attempt to install App1?

A. January 2, 2024

B. January 5, 2024

C. January 8, 2024

D. January 31, 2024

Question #297

Topic 1

You have a Microsoft 365 E5 subscription that contains the devices shown in the following table.

Name	Platform	Join type
Device1	Windows 11	Microsoft Entra registered
Device2	Windows 10	Microsoft Entra joined
Device3	Android	Microsoft Entra registered
Device4	iOS	Microsoft Entra registered

All the devices are enrolled in Microsoft Intune and have Microsoft 365 Apps for enterprise installed.

On which devices can you use the Cloud Policy service for Microsoft 365 to manage Microsoft 365 Apps for enterprise?

A. Device2 only

B. Device1 and Device2 only

C. Device1, Device2, and Device3 only

D. Device1, Device2, and Device4 only

E. Device1, Device2, Device3, and Device4

HOTSPOT

-

You have an Azure subscription that is linked to a Microsoft Entra tenant. The tenant contains the devices shown in the following table.

Name	Platform	Join type
Device1	Windows 11	Microsoft Entra registered
Device2	Windows 10	Microsoft Entra joined
Device3	Android	Microsoft Entra registered

You install the Azure Monitor Agent on all supported devices.

You create a monitored object (MO) and associate the MO to a data collection rule (DCR) named DCR1.

You configure DCR1 as shown in the following exhibit.

Add data source

×

*Data source

Destination

Select which data source type and the data to collect for your resource(s).

Data source type *

Performance Counters

Choose Basic to enable the collection of performance counters. Choose Custom if you want more control over which performance counters are collected.

None

Basic

Custom

☐ Performance counter

Sample rate (seconds)

☒ CPU

60

☒ Memory

60

☐ Disk

60

☐ Network

60

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
Azure Monitor collects CPU performance data from Device1.	☐	☐
Azure Monitor collects memory performance data from Device2.	☐	☐
Azure Monitor collects CPU performance data from Device3.	☐	☐

Question #299

Topic 1

You have a Microsoft 365 subscription that contains 500 computers that run Windows 11. The computers are Microsoft Entra joined and are enrolled in Microsoft Intune.

You plan to manage Microsoft Defender for Endpoint on the computers.

You need to prevent users from disabling Microsoft Defender for Endpoint.

What should you do?

A. From the Microsoft Intune admin center, create an attack surface reduction (ASR) policy.

B. From the Microsoft Intune admin center, create an account protection policy.

C. From the Microsoft Defender portal, enable tamper protection.

D. From the Microsoft Intune admin center, create a device compliance policy.

Question #300

Topic 1

You have a Microsoft 365 E5 subscription.

You need to manage operating system updates for corporate-owned Android Enterprise devices enrolled in Microsoft Intune.

What should you use?

A. a compliance policy

B. an Android FOTA deployment

C. an Endpoint security policy

D. a configuration profile

Question #301

Topic 1

You have a Microsoft 365 subscription.

You use Microsoft Intune to manage devices.

You plan to deploy two apps named App1 and App2 to all Windows devices. App1 must be installed before App2.

From the Intune admin center, you create and deploy two Windows app (Win32) apps.

You need to ensure that App1 is installed before App2 on every device.

What should you configure?

A. the App1 deployment configurations

B. a dynamic device group

C. the App2 deployment configurations

HOTSPOT

-

You have a Microsoft Entra tenant that contains the users shown in the following table.

Name	Multifactor authentication	Passwordless Capable	Methods Registered
User1	Capable	Not Capable	Mobile phone
User2	Capable	Not Capable	Software OATH token
User3	Capable	Not Capable	Microsoft Authenticator app (push notification), Software OATH token
User4	Capable	Capable	Microsoft Passwordless phone sign-in, Microsoft Authenticator app (push notification), Software OATH token

When you sign in to the tenant, the available verification methods are shown in the following exhibit.

Verify your identity

 Use a security key

 Approve a request on my Microsoft Authenticator app

 123 Use a verification code

 Text +XXX XXXXXXXX65

Which users will be prompted for the verification code method, and which users will be prompted for the text method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Verification code:

User1 only
User3 and User4 only
User1, User3, and User4 only
User2, User3, and User4 only
User1, User2, User3, and User4

Text:

User1 only
User3 and User4 only
User1, User3, and User4 only
User2, User3, and User4 only
User1, User2, User3, and User4
