Topic 1 - Exam A

Question #1

Topic 1

HOTSPOT -

Case study -

Overview -

ADatum Corporation is a consulting company that has a main office in Montreal and branch offices in Seattle and New York.

ADatum has a Microsoft 365 E5 subscription.

Environment -

Network Environment -

The network contains an on-premises Active Directory domain named adatum.com. The domain contains the servers shown in the following table.

Name	Operating system	Role
DC1	Windows Server 2019	Domain controller
Server1	Windows Server 2016	Member server
Server2	Windows Server 2019	Member server

ADatum has a hybrid Azure AD tenant named adatum.com.

Users and Groups -

The adatum.com tenant contains the users shown in the following table.

Name	Azure AD role	Member of
User1	Cloud Device Administrator	GroupA
User2	Azure AD Joined Device Local Administrator	GroupB
User3	Global Reader	GroupA, GroupB
User4	Global Administrator	Group1

All users are assigned a Microsoft Office 365 license and an Enterprise Mobility + Security E3 license.

Enterprise State Roaming is enabled for Group1 and GroupA.

Group1 and Group2 have a Membership type of Assigned.

Devices -

ADatum has the Windows 10 devices shown in the following table.

Name	Type	Member of	Scope (Tags)
Device1	Corporate-owned	Group1	Default
Device2	Corporate-owned	Group1, Group2	Tag2
Device3	Personally-owned	Group1	Tag1
Device4	Personally-owned	Group2	Tag2
Device5	Corporate-owned	Group3	Default

The Windows 10 devices are joined to Azure AD and enrolled in Microsoft Intune.

The Windows 10 devices are configured as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Secure Boot	VPN connection
Device1	Yes	No	VPN1
Device2	Yes	Yes	VPN1, VPN3
Device3	No	No	VPN3
Device4	No	Yes	None
Device5	Yes	No	None

All the Azure AD joined devices have an executable file named C:\AppA.exe and a folder named D:\Folder1.

Microsoft Intune Configuration -

Microsoft Intune has the compliance policies shown in the following table.

Name	Configuration	Assignment
Policy1	Require BitLocker only	Group1
Policy2	Require Secure Boot only	Group1
Policy3	Require BitLocker and Secure Boot	Group2

The Compliance policy settings are shown in the following exhibit.

These settings configure the way the compliance service treats devices. Each device evaluates these as a "Built-in Device Compliance Policy", which is reflected in device monitoring.

Mark devices with no compliance policy assigned as ⓘ

Allow White Glove OOBE	No
Apply device name template	No

Assignments

Included groups	Group1
Excluded groups	Group2

Currently, there are no devices deployed by using Windows Autopilot.
The Intune connector for Active Directory is installed on Server1.

Requirements -

Planned Changes -

ADatum plans to implement the following changes:
Purchase a new Windows 10 device named Device6 and enroll the device in Intune
New computers will be deployed by using Windows Autopilot and will be hybrid Azure AD joined.
Deployed a network boundary configuration profile that will have the following settings:

Name: Boundary1 -
Network boundary: 192.168.1.0/24

Scope tags: Tag1 -
Assignments:

Included groups: Group1, Group2 -

Deploy two VPN configuration profiles named Connection1 and Connection2 that will have the following settings:

Name: Connection1 -

Connection name: VPN1 -

Connection type: L2TP -

Assignments:

Included groups: Group1, Group2, GroupA

Excluded groups: --

Name: Connection2 -

Connection name: VPN2 -

Connection type: IKEv2 -

Assignments:

Included groups: GroupA -

Excluded groups: GroupB -

Technical Requirements -

ADatum must meet the following technical requirements:

Users in GroupA must be able to deploy new computers.

Administrative effort must be minimized.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can create a file named D:\Folder1\file1.txt on Device4 by using Notepad.	☐	☐
User2 can remove D:\Folder1 from the list of protected folders on Device2.	☐	☐
User3 can create a file named C:\Users\User3\Desktop\file1.txt on Device2 by running a custom Windows PowerShell script.	☐	☐

ADatum must meet the following technical requirements:
Users in GroupA must be able to deploy new computers.
Administrative effort must be minimized.
You implement Boundary1 based on the planned changes.
Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device1, Device2, and Device5 only
- D. Device1, Device2, Device3, and Device4 only

Question #5

Topic 1

HOTSPOT -

You have a Microsoft 365 subscription.

You use Microsoft Intune Suite to manage devices.

You have the iOS app protection policy shown in the following exhibit.

Access requirements

PIN for access	Require
PIN type	Numeric
Simple PIN	Allow
Select minimum PIN length	6
Touch ID instead of PIN for access (iOS8+/iPadOS)	Allow
Override biometrics with PIN after timeout	Require
Timeout (minutes of inactivity)	30
Face ID instead of PIN for access (iOS11+/iPadOS)	Block
PIN reset after number of days	No
Number of days	0
App PIN when device PIN is set	Require
Work or school account credentials for access	Require
Recheck the access requirements after /minutes of inactivity	30

Conditional launch

Setting	Value	Action
Max PIN attempts	5	Reset PIN
Offline grace period	720	Block access (minutes)
Offline grace period	90	Wipe data (days)
Jailbroken/rooted devices		Block access

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

After 30 minutes of inactivity, a user will be prompted for their

account credentials only
PIN only
PIN and account credentials

Entering the wrong PIN five times will

block access
reset the app PIN
reset the device PIN
wipe company data

Question #6

Topic 1

DRAG DROP -

You have a Microsoft 365 E5 subscription and a computer that runs Windows 11.

You need to create a customized installation of Microsoft 365 Apps for enterprise.

Which four actions should you perform in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Actions

Run `setup.exe` and specify the `/packager` switch.

Download the Microsoft Office Deployment Tool (ODT) and run the self-extracting executable (.exe) file.

Edit the XML configuration file.

Run `setup.exe` and specify the `/download` switch.

Run `setup.exe` and specify the `/configure` switch.

Answer Area

1

2

3

4

Question #7

Topic 1

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 11
Device3	Android
Device4	iOS

On which devices can you apply app configuration policies?

A. Device2 only

B. Device1 and Device2 only

C. Device3 and Device4 only

D. Device2, Device3, and Device4 only

E. Device1, Device2, Device3, and Device4

Question #8

Topic 1

HOTSPOT -

You have an Azure AD tenant named contoso.com that contains the devices shown in the following table.

Name	Operating system
Device1	Windows 10
Device2	Android 8.0
Device3	Android 9
Device4	iOS 11.0
Device5	iOS 11.4.1

All devices contain an app named App1 and are enrolled in Microsoft Intune.

You need to prevent users from copying data from App1 and pasting the data into other apps.

Which type of policy and how many policies should you create in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Policy type:

▼

App configuration policy

App protection policy

Conditional access policy

Device compliance policy

Minimum number of policies:

▼

1

2

3

4

5

Question #9

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You plan to deploy two apps named App1 and App2 to all Windows devices. App1 must be installed before App2.

From the Intune admin center, you create and deploy two Windows app (Win32) apps.

You need to ensure that App1 is installed before App2 on every device.

What should you configure?

A. the App1 deployment configurations

B. a dynamic device group

C. a detection rule

D. the App2 deployment configurations

Question #10

Topic 1

You have a Microsoft Intune subscription.

You have devices enrolled in Intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage App1?

A. 1

B. 2

C. 3

D. 4

E. 5

Question #11

Topic 1

You have a Microsoft 365 E5 subscription that contains 100 iOS devices enrolled in Microsoft Intune.

You need to deploy a custom line-of-business (LOB) app to the devices by using Intune.

Which extension should you select for the app package file?

A. .intunemac

B. .ipa

C. .apk

D. .appx

Question #12

Topic 1

You have a Microsoft 365 E5 subscription that contains a user named User1 and a web app named App1. App1 must only accept modern authentication requests. You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

Assignments -
Users or workload identities: User1

Cloud apps or actions: App1 -

Access controls -

Grant: Block access -
You need to block only legacy authentication requests to App1. Which condition should you add to CAPolicy1?

- A. Filter for devices
- B. Device platforms
- C. User risk
- D. Sign-in risk
- E. Client apps

Question #13

Topic 1

HOTSPOT -

All users have Microsoft 365 apps deployed.

You need to configure Microsoft 365 apps to meet the following requirements:

Enable the automatic installation of WebView2 Runtime.

Prevent users from submitting feedback.

Which two settings should you configure in the Microsoft 365 Apps admin center? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Question #14

Topic 1

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM).

You need to deploy the Microsoft 365 Apps for enterprise suite to all the computers.

What should you do?

A. From the Microsoft Intune admin center, create a Windows 10 device profile.

B. From Azure AD, add an app registration.

C. From Azure AD, add an enterprise application.

D. From the Microsoft Intune admin center, add an app.

Question #15

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You have a Windows 11 device named Device1 that is enrolled in Intune. Device1 has been offline for 30 days.

You need to remove Device1 from Intune immediately. The solution must ensure that if the device checks in again, any apps and data provisioned by Intune are removed. User-installed apps, personal data, and OEM-installed apps must be retained.

What should you use?

A. a Delete action

B. a Retire action

C. a Fresh Start action

D. an Autopilot Reset action

Question #16

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to review the startup times and restart frequencies of the devices.

What should you use?

A. Azure Monitor

B. Intune Data Warehouse

C. Microsoft Defender for Endpoint

D. Endpoint analytics

Question #17

Topic 1

HOTSPOT -

You have a Microsoft 365 E5 subscription.

You create a new update rings policy named Policy1 as shown in the following exhibit.

Update ring settings [Edit](#)

Update settings	
Microsoft product updates	Allow
Windows drivers	Allow
Quality update deferral period (days)	0
Feature update deferral period (days)	30
Upgrade Windows 10 devices to Latest Windows 11 release	No
Set feature update uninstall period (2 - 60 days)	10
Servicing channel	General Availability channel
User experience settings	
Automatic update behavior	Auto install at maintenance time
Active hours start	8 AM
Active hours end	5 PM
Restart checks	Allow
Option to pause Windows updates	Enable
Option to check for Windows updates	Enable
Change notification update level	Use the default Windows Update notifications
Use deadline settings	Allow
Deadline for feature updates	30
Deadline for quality updates	0
Grace period	0
Auto reboot before deadline	No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

Updates that contain fixes and improvements to existing Windows functionality **[answer choice]**

can be deferred indefinitely
can be deferred for 30 days
will be installed immediately

Updates that contain new Windows functionality will be installed within **[answer choice]** of release

1 day
30 days
60 days

Question #18

Topic 1

You have computers that run Windows 10 and connect to an Azure Log Analytics workspace. The workspace is configured to collect all available events from the Windows event logs.

The computers have the logged events shown in the following table.

Event ID	Log	Type	Computer
1	Application	Success	Computer1
2	System	Information	Computer1
3	Security	Audit Success	Computer2
4	System	Error	Computer2

Which events are collected in the Log Analytics workspace?

A. 1 only

B. 2 and 3 only

C. 1 and 3 only

D. 1, 2, and 4 only

E. 1, 2, 3, and 4

Question #19

Topic 1

You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in Microsoft Intune.

You need to configure the devices to run a single app in kiosk mode.

Which Configuration settings should you modify in the device restrictions profile?

A. Users and Accounts

B. General

C. System security

D. Device experience

Question #20

Topic 1

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune.

You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort.

What should you do?

A. Onboard the macOS devices to the Microsoft Purview compliance portal.

B. From the Microsoft Intune admin center, create a security baseline.

C. Install Defender for Endpoint on the macOS devices.

D. From the Microsoft Intune admin center, create a configuration profile.

Question #21

Topic 1

You have an Azure AD tenant and 100 Windows 10 devices that are Azure AD joined and managed by using Microsoft Intune.

You need to configure Microsoft Defender Firewall and Microsoft Defender Antivirus on the devices. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. To configure Microsoft Defender Antivirus, create a Group Policy Object (GPO) and configure the Windows Defender Antivirus settings.

B. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Device restrictions settings.

C. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Endpoint protection settings.

D. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the Device restrictions settings.

E. To configure Microsoft Defender Firewall, create a device configuration profile and configure the Endpoint protection settings.

F. To configure Microsoft Defender Firewall, create a Group Policy Object (GPO) and configure Windows Defender Firewall with Advanced Security.

Question #22

Topic 1

You have an Azure AD group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2.

You create a device configuration profile named Profile1. You assign Profile1 to Group1.

You need to ensure that Profile1 applies to Device1 only.

What should you modify in Profile1?

A. Assignments

B. Settings

C. Scope (Tags)

D. Applicability Rules

Question #23

Topic 1

DRAG DROP -

You have a Microsoft 365 subscription that includes Microsoft Intune.

You need to implement a Microsoft Defender for Endpoint solution that meets the following requirements:

Enforces compliance for Defender for Endpoint by using Conditional Access

Prevents suspicious scripts from running on devices

What should you configure? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features

A device restriction policy

A security baseline

An attack surface reduction (ASR) rule

An Intune connection

Answer Area

Enforces compliance:

Prevents suspicious scripts:

Question #24

Topic 1

Your network contains an on-premises Active Directory domain and an Azure AD tenant.

The Default Domain Policy Group Policy Object (GPO) contains the settings shown in the following table.

Name	GPO value
LockoutBadCount	0
MaximumPasswordAge	42
MinimumPasswordAge	1
MinimumPasswordLength	7
PasswordComplexity	True
PasswordHistorySize	24

You need to migrate the existing Default Domain Policy GPO settings to a device configuration profile.

Which device configuration profile type template should you use?

A. Administrative Templates

B. Endpoint protection

C. Device restrictions

D. Custom

Question #25

Topic 1

You have 100 computers that run Windows 10 and connect to an Azure Log Analytics workspace.

Which three types of data can you collect from the computers by using Log Analytics? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. failure events from the Security log

B. the list of processes and their execution times

C. the average processor utilization

D. error events from the System log

E. third-party application logs stored as text files

Question #26

Topic 1

You have a Microsoft 365 E5 subscription. The subscription contains 25 computers that run Windows 11 and are enrolled in Microsoft Intune.

You need to onboard the devices to Microsoft Defender for Endpoint.

What should you create in the Microsoft Intune admin center?

A. an attack surface reduction (ASR) policy

B. a security baseline

C. an endpoint detection and response (EDR) policy

D. an account protection policy

E. an antivirus policy

Question #27

Topic 1

Your company uses Microsoft Intune to manage devices.
You need to ensure that only Android devices that use Android work profiles can enroll in Intune.
Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. From Platform Settings, set Android device administrator Personally Owned to Block.
- B. From Platform Settings, set Android Enterprise (work profile) to Allow.
- C. From Platform Settings, set Android device administrator Personally Owned to Allow.
- D. From Platform Settings, set Android device administrator to Block.

HOTSPOT -

You have the device configuration profile shown in the following exhibit.

Kiosk

Windows 10 and later

- ✓ Basics
- 2 Configuration settings**
- ③ Assignments

Configure your devices to run in kiosk mode. Before you select a kiosk mode, review your app assignments in the Mobile Apps blade. Apps that you want to run in kiosk mode should be assigned to a Windows device. [Learn more about Windows kiosk mode.](#)

Select a kiosk mode * ⓘ

Single app, full-screen kiosk

User logon type * ⓘ

Auto logon (Windows 10, version 1803+)

Refresh browser after idle time ⓘ

5

Specify Maintenance Window for App Restarts * ⓘ

Require

Not configured

Maintenance Window Start Time

MM/DD/YYYY

h:mm:ss A

Maintenance Window Recurrence ⓘ

Daily (recommended)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

Users **[answer choice]**

can access any URL

cannot view the address bar in Microsoft Edge

can only access URLs that include contoso.com

can only access URLs that start with https://contoso.com

Windows 10 and later devices can have **[answer choice]**

a single Microsoft Edge instance that has a single tab

a single Microsoft Edge instance that has multiple tabs

multiple Microsoft Edge instances that have multiple tabs

multiple Microsoft Edge instances that each has a single tab

Question #29

Topic 1

HOTSPOT -

You have 100 Windows 10 devices enrolled in Microsoft Intune.

You need to configure the devices to retrieve Windows updates from the internet and from other computers on a local network.

Which Delivery Optimization setting should you configure, and which type of Intune object should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Delivery Optimization setting:

▼

Bandwidth optimization type
Download mode
VPN peer caching

Intune object:

▼

A configuration profile
App configuration policies
Windows 10 and later quality updates
Windows 10 and later update rings

Question #30

Topic 1

HOTSPOT -

You have an Azure AD tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1
Device2	Android	Group1
Device3	iOS	Group2

From Intune, you create and send a custom notification named Notification1 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 receives Notification1 on Device1.	☐	☐
User2 receives Notification1 on Device2.	☐	☐
User1 receives Notification1 on Device3.	☐	☐

Question #31

Topic 1

You use Microsoft Intune and Intune Data Warehouse.

You need to create a device inventory report that includes the data stored in the data warehouse.

What should you use to create the report?

A. the Company Portal app

B. Endpoint analytics

C. the Azure portal app

D. Microsoft Power BI

Question #32

Topic 1

You have a Microsoft 365 E5 subscription and 25 Apple iPads.

You need to enroll the iPads in Microsoft Intune by using the Apple Configurator enrollment method.

What should you do first?

A. Configure an Apple MDM push certificate.

B. Add your user account as a device enrollment manager (DEM).

C. Modify the enrollment restrictions.

D. Upload a file that has the device identifiers for each iPad.

Question #33

Topic 1

HOTSPOT -

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Azure AD.

The computers have different update settings, and some computers are configured for manual updates.

You need to configure Windows Update. The solution must meet the following requirements:

The configuration must be managed from a central location.

Internet traffic must be minimized.

Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows Update technology to use:

Windows Server Update Services (WSUS)

Microsoft Configuration Manager

Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)

Microsoft Configuration Manager

Microsoft Intune

Manage the traffic by using:

Delivery Optimization

BranchCache

Peer cache

Question #34

Topic 1

You have a Microsoft 365 E5 subscription that contains 150 hybrid Azure AD joined Windows devices. All the devices are enrolled in Microsoft Intune.

You need to configure Delivery Optimization on the devices to meet the following requirements:

- Allow downloads from the internet and from other computers on the local network.
- Limit the percentage of used bandwidth to 50.

What should you use?

A. a configuration profile

B. a Windows Update for Business Group Policy setting

C. a Microsoft Peer-to-Peer Networking Services Group Policy setting

D. an Update ring for Windows 10 and later profile

Question #35

Topic 1

Your network contains an Active Directory domain named contoso.com. The domain contains a computer named Computer1 that runs Windows 10.

You have the groups shown in the following table.

Name	Type	Location
Group1	Universal distribution group	Contoso.com
Group2	Global security group	Contoso.com
Group3	Group	Computer1
Group4	Group	Computer1

Which groups can you add to Group4?

A. Group2 only

B. Group1 and Group2 only

C. Group2 and Group3 only

D. Group1, Group2, and Group3

Question #36

Topic 1

DRAG DROP -

You have a Microsoft 365 subscription. The subscription contains computers that run Windows 11 and are enrolled in Microsoft Intune.

You need to create a compliance policy that meets the following requirements:

- Requires BitLocker Drive Encryption (BitLocker) on each device
- Requires a minimum operating system version

Which setting of the compliance policy should you configure for each requirement? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings

Device Health

Device Properties

Microsoft Defender for Endpoint

System Security

Answer Area

Requires BitLocker:

Requires a minimum operating system version:

HOTSPOT -

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You have the Windows 11 devices shown in the following table.

Name	Member of	BitLocker Drive Encryption (BitLocker)
Device1	Group1	Enabled
Device2	Group1, Group3	Disabled
Device3	Group1, Group2	Enabled

You deploy the device compliance policy shown in the exhibit. (Click the Exhibit tab.)

Basics [Edit](#)

Name	Policy1
Description	--
Platform	Windows 10 and later
Profile type	Windows 10/11 compliance policy

Compliance settings [Edit](#)

Device Health

Require BitLocker	Require
-------------------	---------

Actions for noncompliance [Edit](#)

Action	Schedule	Message template	Additional recipients (via email)
Mark device noncompliant	Immediately		

Scope tags [Edit](#)

Default

Assignments [Edit](#)

Included groups

Group
Group1
Group3

Excluded groups

Group
Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 will have Policy assigned and will be marked as compliant.	☐	☐
Device2 will have Policy assigned and will be marked as compliant.	☐	☐
Device3 will have Policy assigned and will be marked as compliant.	☐	☐

Question #38

Topic 1

DRAG DROP -

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system builds can access network resources.

Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings

Require BitLocker

Prevent jailbroken devices from having corporate access.

Prevent rooted devices from having corporate access.

Require Secure Boot to be enabled on the device.

Answer Area

Device1:

Device2:

Device3:

<https://www.examtopics.com/exams/microsoft/md-102/custom-view/>

35/230

DRAG DROP -

You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune.

You plan to create and monitor the results of a compliance policy used to validate the BIOS version of the devices.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- Review the compliance dashboard for results.
- Create and assign a compliance policy that has System Security settings configured.
- Review the Conditional Access Insights and Reporting workbook for results.
- Create a PowerShell discovery script and a JSON file.
- Upload the PowerShell script to Intune.
- Upload the JSON file to Azure AD.
- Create and assign a custom compliancy policy.

Question #40

Topic 1

DRAG DROP -

You have a computer that runs Windows 10 and contains two local users named User1 and User2.

You need to ensure that the users can perform the following actions:

User1 must be able to adjust the date and time.

User2 must be able to clear Windows logs.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Groups

Administrators

Event Log Readers

Performance Log Users

Power Users

System Managed Accounts Group

Answer Area

User1:

User2:

Question #41

Topic 1

HOTSPOT -

You have an Azure AD tenant named contoso.com.

You have the devices shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Windows 10
Device3	iOS
Device4	Ubuntu Linux

Which devices can be Azure AD joined, and which devices can be registered in contoso.com? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Azure AD joined:

Device1 only

Device1 and Device2 only

Device1 and Device3 only

Device1, Device2, and Device3 only

Device1, Device2, Device3, and Device4

Registered in contoso.com:

Device1 and Device2 only

Device2 and Device3 only

Device3 and Device4 only

Device2, Device3, and Device4 only

Device1, Device2, Device3, and Device4

Question #42

Topic 1

HOTSPOT -

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

Name	Role
Admin1@contoso.com	Security Administrator
Admin2@contoso.com	Cloud Device Administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup and has the local users shown in the following table.

Name	Member of
Administrator1	Network Configuration Operators
Administrator2	Power Users
UserA	Administrators

UserA joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	☐	☐
Admin1@contoso.com can configure the firewall and Microsoft Defender on Computer1.	☐	☐
Admin2@contoso.com can install software on Computer1.	☐	☐

Question #43

Topic 1

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

A. Access Control Assistance Operators

B. Remote Desktop Users

C. Power Users

D. Remote Management Users

Question #44

Question #45

Topic 1

HOTSPOT -

You have a server named Server1 and computers that run Windows 10. Server1 has the Microsoft Deployment Toolkit (MDT) installed.

You plan to upgrade the Windows 10 computers to Windows 11 by using the MDT deployment wizard.

You need create a deployment share on Server1.

What should you do on Server1, and what are the minimum components you should add to the MDT deployment share? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

On Server1:

▼

Import the Deployment Image Servicing and Management (DISM) PowerShell module
Import the WindowsAutopilotIntune Windows Powershell module.
Install the Windows Assessment and Deployment Kit (Windows ADK).
Install the Windows Deployment Services server role.

Add to the MDT deployment share:

▼

Windows 11 image and package only
Windows 11 image and task sequence only
Windows 11 image only
Windows 11 image, task sequence, and package

DRAG DROP -

You have a Microsoft Deployment Toolkit (MDT) server named MDT1.

When computers start from the LiteTouchPE_x64.iso image and connect to MDT1, the welcome screen appears as shown in the following exhibit.

You need to prevent the welcome screen from appearing when the computers connect to MDT1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Modify the task sequence.

Replace the ISO image.

Modify the CustomSettings.ini file

Modify the Bootstrap.ini file

Update the deployment share.

Question #50

Topic 1

HOTSPOT -

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

Azure AD joined Windows devices enroll automatically in Intune.

You have the devices shown in the following table.

Name	Operating system	Azure AD joined	Line-of-business (LOB) apps installed
Device1	64-bit version of Windows 10 Pro	Yes	No
Device2	32-bit version of Windows 10 Pro	No	Yes
Device3	64-bit version of Windows 10 Pro	No	Yes

You are preparing to upgrade the devices to Windows11. All the devices are compatible with Windows 11.

You need to evaluate Windows Autopilot and in-place upgrade as deployment methods to implement Windows 11 Pro on the devices, while retaining all user settings and applications.

Which devices can be upgraded by using each method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Windows Autopilot:

▼

None of the devices
Device1 only
Device1 and Device3 only
Device1, Device2, and Device3

In-place upgrade:

▼

None of the devices
Device1 only
Device1 and Device3 only
Device1, Device2, and Device3

Question #51

Topic 1

DRAG DROP -

You have 100 computers that run Windows 10.

You plan to deploy Windows 11 to the computers by performing a wipe and load installation.

You need to recommend a method to retain the user settings and the user data.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Configure known folder redirection in Microsoft OneDrive.

Run `scanstate.exe`.

Run `loadstate.exe`.

Enable Enterprise State Roaming.

Create a system image Backup.

Deploy Windows 11.

Restore a system image backup.

Answer Area

Question #52

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You use Windows Autopilot to deploy Windows 11 to devices.

A support engineer reports that when a deployment fails, they cannot collect deployment logs from failed device.

You need to ensure that when a deployment fails, the deployment logs can be collected.

What should you configure?

A. the automatic enrollment settings

B. the Windows Autopilot deployment profile

C. the enrollment status page (ESP) profile

D. the device configuration profile

<https://www.examtopics.com/exams/microsoft/md-102/custom-view/>

45/230

Question #53

Topic 1

You have a Microsoft 365 E5 subscription that contains a user named User1 and uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You have a device named Device1 that is enrolled in Intune.

You need to ensure that User1 can use Remote Help from the Intune admin center for Device1.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Deploy the Remote Help app to Device1.

B. Assign the Help Desk Operator role to User1.

C. Assign the Intune Administrator role to User1.

D. Assign a Microsoft 365 E5 license to User1.

E. Rerun device onboarding on Device1.

F. Assign the Remote Help add-on license to User1.

Question #54

Topic 1

You have a Windows 11 capable device named Device1 that runs the 64-bit version of Windows 10 Enterprise and has Microsoft Office 2019 installed.

You have the Windows 11 Enterprise images shown in the following table.

Name	Platform	Description
Image1	x64	Custom Windows 11 image that has Office 2021 installed
Image2	x64	Default Windows 11 image created by Microsoft

Which images can be used to perform an in-place upgrade of Device1?

A. Image1 only

B. Image2 only

C. Image1 and Image2

Question #55

Topic 1

HOTSPOT -

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant by using Azure AD Connect.

You use Microsoft Intune and Configuration Manager to manage devices.

You need to recommend a deployment plan for new Windows 11 devices. The solution must meet the following requirements:

Devices for the marketing department must be joined to the AD DS domain only. The IT department will install complex applications on the devices at build time, before giving the devices to the marketing department users.

Devices for the sales department must be Azure AD joined. The devices will be shipped directly from the manufacturer to the homes of the sales department users.

Administrative effort must be minimized.

Which deployment method should you recommend for each department? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth point.

Answer Area

Sales:

Configuration Manager

Windows Autopilot with automatic registration

Windows Autopilot with manual registration

Windows Autopilot with OEM registration

Marketing:

Configuration Manager

Windows Autopilot with automatic registration

Windows Autopilot with manual registration

Windows Autopilot with OEM registration

Question #56

Topic 1

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1.

In the Out-of-Box Drivers node, you create folders that contain drivers for different hardware models.

You need to configure the Inject Drivers MDT task to use PnP detection to install the drivers for one of the hardware models.

What should you do first?

A. Import an OS package.

B. Create a selection profile.

C. Add a Gather task to the task sequence.

D. Add a Validate task to the task sequence.

Question #57

Topic 1

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1. You need to ensure that MDT1 supports multicast deployments. What should you install on Server1?

A. Multipath I/O (MPIO)

B. Multipoint Connector

C. Windows Deployment Services (WDS)

D. Windows Server Update Services (WSUS)

Question #58

Topic 1

Your company standardizes on Windows 10 Enterprise for all users. Some users purchase their own computer from a retail store. The computers run Windows 10 Pro. You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Azure AD, and install several Microsoft Store apps. The solution must meet the following requirements: Ensure that any applications installed by the users are retained. Minimize user intervention. What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

A. Windows Autopilot

B. Microsoft Deployment Toolkit (MDT)

C. a Windows Configuration Designer provisioning package

D. Windows Deployment Services (WDS)

Question #59

Topic 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com. Solution: From the Microsoft Entra admin center, you modify the User settings and the Device settings. Does this meet the goal?

A. Yes

B. No

Question #60

Topic 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure automatic mobile device management (MDM) enrollment. From the Microsoft Intune admin center, you create and assign a device restrictions profile.

Does this meet the goal?

A. Yes

B. No

Question #61

Topic 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure automatic mobile device management (MDM) enrollment. From the Microsoft Intune admin center, you configure the Windows Hello for Business enrollment options.

Does this meet the goal?

A. Yes

B. No

Case study -

Overview -

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has the users and computers shown in the following table.

Location	Users	Laptops	Desktop computers	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

The company has IT, human resources (HR), legal (LEG), marketing (MKG), and finance (FIN) departments.

Contoso recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment -

The network contains an Active Directory domain named contoso.com that is synced to Azure AD.

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organizational unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration -

The domain has the users shown in the following table.

Name	Role	Member of
User1	Intune administrator	GroupA
User2	None	GroupB

User2 is a device enrollment manager (DEM) in Intune.

The devices enrolled in Intune are shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	Group1
Device2	iOS	Not applicable	Group2, Group3
Device3	Android	Disabled	Group2, Group3
Device4	iOS	Not applicable	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require encryption	Assigned
Policy1	Android	Not configured	Yes
Policy2	iOS	<i>Not applicable</i>	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table.

Name	Include	Exclude
Policy1	Group3	<i>None</i>
Policy2	Group2	Group3
Policy3	Group1	<i>None</i>

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

Requirements -

Planned changes -

Contoso plans to implement the following changes:

- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Implement co-management for the computers.

Technical Requirements -

Contoso must meet the following technical requirements:

- Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- Create a provisioning package for new computers in the HR department.
- Block iOS devices from sending diagnostic and usage telemetry data.
- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.

You need to meet the technical requirements for the iOS devices.

Which object should you create in Intune?

- A. a deployment profile
- B. an app protection policy
- C. a device configuration profile
- D. a compliance policy

Policy1	Android	Not configured	Yes
Policy2	iOS	Not applicable	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table.

Name	Include	Exclude
Policy1	Group3	None
Policy2	Group2	Group3
Policy3	Group1	None

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

Requirements -

Planned changes -

Contoso plans to implement the following changes:

- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Implement co-management for the computers.

Technical Requirements -

Contoso must meet the following technical requirements:

- Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- Create a provisioning package for new computers in the HR department.
- Block iOS devices from sending diagnostic and usage telemetry data.
- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.

What is the maximum number of devices that User1 and User2 can enroll in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

User1 can enroll a maximum of:

▼

5 devices
10 devices
15 devices
1,000 devices
An unlimited number of devices

User2 can enroll a maximum of:

▼

5 devices
10 devices
15 devices
1,000 devices
An unlimited number of devices

- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.

To which devices do Policy1 and Policy2 apply? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Policy1:

▼

Device1 only
Device2 only
Device3 only
Device4 only
Device2 and Device3 only
Device1 and Device3 only
Device1, Device2, and Device3

Policy2:

▼

Device1 only
Device2 only
Device3 only
Device4 only
Device2 and Device3 only
Device1 and Device3 only
Device1, Device2, and Device3

Question #67

Topic 1

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

On Computer1, you need to run the Invoke-Command cmdlet to execute several PowerShell commands on Computer2.

What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet.
- B. On Computer2, add Computer1 to the Remote Management Users group.
- C. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2.
- D. On Computer1, run the New-PSSession cmdlet.

Question #68

Topic 1

You have an Azure AD tenant that contains the devices shown in the following table.

Name	Operating system	Azure AD join type
Device1	Windows 11 Pro	Joined
Device2	Windows 11 Pro	Registered
Device3	Windows 10 Pro	Joined
Device4	Windows 10 Pro	Registered

Which devices can be activated by using subscription activation?

- A. Device1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, Device3, and Device4

Question #69

Topic 1

You have 25 computers that run Windows 10 Pro.

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

You need to upgrade the computers to Windows 11 Enterprise by using an in-place upgrade. The solution must minimize administrative effort.

What should you use?

A. Microsoft Deployment Toolkit (MDT) and a default image of Windows 11 Enterprise

B. Microsoft Configuration Manager and a custom image of Windows 11 Enterprise

C. Windows Autopilot

D. Subscription Activation

Question #70

Topic 1

You use the Microsoft Deployment Toolkit (MDT) to manage Windows 11 deployments.

From Deployment Workbench, you modify the WinPE settings and add PowerShell support.

You need to generate a new set of WinPE boot image files that contain the updated settings.

What should you do?

A. From the Deployment Shares node, update the deployment share.

B. From the Advanced Configuration node, create new media.

C. From the Packages node, import a new operating system package.

D. From the Operating Systems node, import a new operating system.

Question #71

Topic 1

You are replacing 100 company-owned Windows devices.

You need to use the Microsoft Deployment Toolkit (MDT) to securely wipe and decommission the devices. The solution must meet the following requirements:

- Back up the user state.
- Minimize administrative effort.

Which task sequence template should you use?

A. Standard Client Task Sequence

B. Standard Client Replace Task Sequence

C. Litetouch OEM Task Sequence

D. Sysprep and Capture

Question #72

Topic 1

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 11.

You need to enable the Windows Remote Management (WinRM) service on Computer1 and perform the following configurations:

- For the WinRM service, set Startup type to Automatic.
- Create a listener that accepts requests from any IP address.
- Enable a firewall exception for WS-Management communications.

Which PowerShell cmdlet should you use?

A. Connect-WSMan

B. Enable-PSRemoting

C. Invoke-WSManAction

D. Enable-PSSessionConfiguration

Question #73

Topic 1

HOTSPOT -

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant. The tenant contains the users shown in the following table.

Name	Member of	On-premises sync
User1	Group1	Disabled
User2	Group2	Enabled

You assign Windows 10/11 Enterprise E5 licenses to Group1 and User2.

You deploy the devices shown in the following table.

Name	Operating system	Joined to
Device1	Windows 11 Pro	Azure AD
Device2	Windows 11 Pro	AD DS
Device2	Windows 10 Pro	Azure AD

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 signs in to Device1, Device1 is upgraded to Windows 11 Enterprise automatically.	☐	☐
If User2 signs in to Device2, Device2 is upgraded to Windows 11 Enterprise automatically.	☐	☐
If User2 signs in to Device3, Device3 is upgraded to Windows 11 Enterprise automatically.	☐	☐

HOTSPOT

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of	Active Windows Defender Firewall profile
Computer1	Adatum.com	Domain
Computer2	Adatum.com	Domain
Computer3	Workgroup	Public

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password.

On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

The services on Computer1 have the following states.

Status	Name	DisplayName
Stopped	RasAuto	Remote Access Auto Connection Manager
Running	RasMan	Remote Access Connection Manager
Stopped	RemoteAccess	Routing and Remote Access
Stopped	RemoteRegistry	Remote Registry
Stopped	RetailDemo	Retail Demo Service
Running	RmSvc	Radio Management Service
Running	RpcEptMapper	RPC Endpoint Mapper
Stopped	RpcLocator	Remote Procedure Call (RPC) Locator
Running	RpcSs	Remote Procedure Call (RPC)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	☐	☐
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	☐	☐
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	☐	☐

Question #75

Topic 1

You have a Hyper-V host that contains the virtual machines shown in the following table.

Name	Generation	Virtual processors	Memory
VM1	1	4	16 GB
VM2	2	1	8 GB
VM3	2	2	4 GB

On which virtual machines can you install Windows 11?

- A. VM1 only
- B. VM3 only
- C. VM1 and VM2 only
- D. VM2 and VM3 only
- E. VM1, VM2, and VM3

Question #76

Topic 1

HOTSPOT

-

You have a Microsoft 365 subscription that uses Microsoft Intune and contains the users shown in the following table.

Name	Member of	License
User1	Group1	None
User2	Group1	Microsoft 365 E3
User3	Group2	Microsoft 365 E5

Group2 has been assigned in the Enrollment Status Page.

You have the devices shown in the following table.

Name	Operating system	Department
Device1	Windows 10 Pro	Marketing
Device2	Windows 10 Home	Research
Device3	Windows 10	Marketing

You capture and upload the hardware IDs of the devices in the marketing department.

You configure Windows Autopilot.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can complete the Autopilot process on Device1.	☐	☐
User2 can complete the Autopilot process on Device1.	☐	☐
User3 can view device setup information during the enrollment phase of Device1.	☐	☐

Question #77

Topic 1

QUESTION NO: 77 -

You have a Microsoft 365 subscription that contains a user named User1. User1 is assigned a Windows 10/11 Enterprise E3 license.

You use Microsoft Intune Suite to manage devices.

User1 activates the following devices:

- Device1: Windows 11 Enterprise
- Device2: Windows 10 Enterprise
- Device3: Windows 11 Enterprise

How many more devices can User1 activate?

A. 2

B. 3

C. 7

D. 8

Question #78

Topic 1

DRAG DROP

-

Your company has a computer named Computer1 that runs Windows 10.

Computer1 was used by a user who left the company.

You plan to repurpose Computer1 and assign the computer to a new user.

You need to redeploy Computer1 by using Windows Autopilot.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Upload the file by using Microsoft Intune.

Generate a CSV file that contains the computer information.

Reset the computer.

Generate a JSON file that contains the computer information.

Upload the file by running `azcopy.exe`.

Question #79

Topic 1

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 11.

You create a new task sequence by using the Standard Client Task Sequence template to deploy Windows 11 Enterprise to new computers. The computers have a single hard disk.

You need to modify the task sequence to create a system volume and a data volume.

Which phase should you modify in the task sequence?

A. Initialization

B. State Restore

C. Preinstall

D. Postinstall

You have a Microsoft Deployment Toolkit (MDT) deployment share.

From the Deployment Workbench, you open the New Task Sequence Wizard and select the Standard Client Upgrade Task Sequence task sequence template.

You discover that there are no operating system images listed on the Select OS page as shown in the following exhibit.

You need to be able to select an operating system image to perform a Windows 11 in-place upgrade.

What should you do?

- A. Enable monitoring for the deployment share.
- B. Import a full set of source files.
- C. Import a custom image file.
- D. Run the Update Deployment Share Wizard.

Question #81

Topic 1

Your company implements Azure AD, Microsoft 365, Microsoft Intune, and Azure Information Protection. The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.
- Users can use their personal iOS and Android devices to access corporate cloud services.
- Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy.

What should you create?

A. a device configuration profile from the Microsoft Intune admin center

B. a data loss prevention (DLP) policy from the Microsoft Purview compliance portal

C. an insider risk management policy from the Microsoft Purview compliance portal

D. an app protection policy from the Microsoft Intune admin center

Question #82

Topic 1

You have a Microsoft 365 subscription that contains 500 Android Enterprise devices.

All the devices are enrolled in Microsoft Intune.

You need to deliver bookmarks to the Chrome browser on the devices.

What should you create?

A. a compliance policy

B. a configuration profile

C. an app protection policy

D. an app configuration policy

Question #83

Topic 1

You have a Microsoft 365 E5 subscription and 100 computers that run Windows 10.

You need to deploy Microsoft Office Professional Plus 2019 to the computers by using Microsoft Office Deployment Tool (ODT).

What should you use to create a customization file for ODT?

A. the Microsoft 365 admin center

B. the Microsoft Intune admin center

C. the Microsoft Purview compliance portal

D. the Microsoft 365 Apps admin center

Question #84

Topic 1

You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune.

You plan to use Intune to deploy an application named App1 that contains multiple installation files.

What should you do first?

A. Prepare the contents of App1 by using the Microsoft Win32 Content Prep Tool.

B. Create an Android application package (APK).

C. Upload the contents of App1 to Intune.

D. Install the Microsoft Deployment Toolkit (MDT).

HOTSPOT

-

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Intune admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

LT1 will have Microsoft 365 apps installed.	☐	☐
LT2 will have Microsoft 365 apps installed.	☐	☐
LT3 will have Microsoft 365 apps installed.	☐	☐

Question #86

Topic 1

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What two configurations should you perform from the Microsoft Intune admin center? Each correct answer is a complete solution.

NOTE: Each correct selection is worth one point.

- A. a device restrictions device configuration profile
- B. an app configuration policy
- C. a Windows 10 and later security baseline
- D. a custom device configuration profile
- E. a Windows 10 and later update ring

Question #87

Topic 1

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune.

You plan to use Endpoint analytics.

You need to create baseline metrics.

What should you do first?

- A. Modify the Baseline regression threshold.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.
- D. Create an Azure Monitor workbook.

Question #88

Topic 1

You install a feature update on a computer that runs Windows 10.

How many days do you have to roll back the update?

A. 5

B. 10

C. 14

D. 30

Question #89

Topic 1

You have a Microsoft Azure subscription that contains an Azure Log Analytics workspace.

You deploy a new computer named Computer1 that runs Windows 10. Computer1 is in a workgroup.

You need to ensure that you can use Log Analytics to query events from Computer1.

What should you do on Computer1?

A. Join Azure AD.

B. Configure Windows Defender Firewall.

C. Create an event subscription

D. Install the Azure Monitor Agent.

Question #90

Topic 1

You have a Microsoft 365 E5 subscription and 100 unmanaged iPad devices.

You need to deploy a specific iOS update to the devices. Users must be prevented from manually installing a more recent version of iOS.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Create a device configuration profile.

B. Enroll the devices in Microsoft Intune by using the Intune Company Portal.

C. Create a compliance policy.

D. Create an iOS app provisioning profile.

E. Enroll the devices in Microsoft Intune by using Apple Business Manager.

Question #91

Topic 1

You have a Microsoft 365 subscription that includes Microsoft Intune.

You have an update ring named UpdateRing1 that contains the following settings:

- Automatic update behavior: Auto install and restart at a scheduled time
- Automatic behavior frequency: First week of the month
- Scheduled install day: Tuesday
- Scheduled install time: 3 AM

From the Microsoft Intune admin center, you select Uninstall for the feature updates of UpdateRing1.

When will devices start to remove the feature updates?

A. when a user approves the uninstall

B. as soon as the policy is received

C. next Tuesday

D. the first Tuesday of the next month

Question #92

Topic 1

You have a hybrid deployment of Azure AD that contains 50 Windows 10 devices. All the devices are enrolled in Microsoft Intune.

You discover that Group Policy settings override the settings configured in Microsoft Intune policies.

You need to ensure that the settings configured in Microsoft Intune override the Group Policy settings.

What should you do?

A. From Group Policy Management Editor, configure the Computer Configuration settings in the Default Domain Policy.

B. From the Microsoft Intune admin center, create a custom device profile.

C. From the Microsoft Intune admin center, create an Administrative Templates device profile.

D. From Group Policy Management Editor, configure the User Configuration settings in the Default Domain Policy.

Question #93

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to ensure that the startup performance of managed Windows 11 devices is captured and available for review in the Intune admin center.

What should you configure?

A. the Azure Monitor agent

B. a device compliance policy

C. a Conditional Access policy

D. an Intune data collection policy

HOTSPOT

-

You have a Microsoft 365 E5 subscription that uses Microsoft Intune.

Devices are enrolled in Intune as shown in the following table.

Name	Platform	Enrolled by using
Device1	iOS	Apple Automated Device Enrollment (ADE)
Device2	iPadOS	Apple Automated Device Enrollment (ADE)
Device3	iPadOS	The Company Portal app

The devices are the members of groups as shown in the following table.

Name	Members
Group1	Device1, Device2, Device3
Group2	Device2

You create an iOS/iPadOS update profile as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If an iOS update becomes available on Tuesday at 5 AM, the update is installed on Device1 automatically on Wednesday.	☐	☐
If an iPadOS update becomes available on Thursday at 2 AM, the update is installed on Device2 automatically on Thursday.	☐	☐
If an iPadOS update becomes available on Friday at 10 PM, the update is installed on Device3 automatically on Sunday.	☐	☐

Question #95

Topic 1

You have a Microsoft Intune deployment that contains the resources shown in the following table.

Name	Type	Platform
Comply1	Device compliance policy	Windows 10 and later
Comply2	Device compliance policy	iOS/iPadOS
CA1	Conditional Access policy	<i>Not applicable</i>
Conf1	Device configuration profile	Windows 10 and later
Office1	Office app policy	<i>Not applicable</i>

You create a policy set named Set1 and add Comply1 to Set1.

Which additional resources can you add to Set1?

- A. Conf1 only
- B. Comply2 only
- C. Comply2 and Conf1 only
- D. CA1, Conf1, and Office1 only
- E. Comply2, CA1, Conf1, and Office1

Question #96

Topic 1

You use Microsoft Defender for Endpoint to protect computers that run Windows 10.

You need to assess the differences between the configuration of Microsoft Defender for Endpoint and the Microsoft-recommended configuration baseline.

Which tool should you use?

- A. Microsoft Defender for Endpoint Power BI app
- B. Microsoft Secure Score
- C. Endpoint Analytics
- D. Microsoft 365 Defender portal

Question #97

Topic 1

You have a Microsoft 365 E5 subscription that contains 1,000 Windows 11 devices. All the devices are enrolled in Microsoft Intune.

You plan to integrate Intune with Microsoft Defender for Endpoint.

You need to establish a service-to-service connection between Intune and Defender for Endpoint.

Which settings should you configure in the Microsoft Intune admin center?

A. Premium add-ons

B. Connectors and tokens

C. Tenant enrollment

D. Microsoft Tunnel Gateway

Question #98

Topic 1

DRAG DROP

-

You have a Microsoft Intune subscription that is configured to use a PFX certificate connector to an on-premises Enterprise certification authority (CA).

You need to use Intune to configure autoenrollment for Android devices by using public key pair (PKCS) certificates.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

From the Microsoft Intune admin center, configure enrollment restrictions.

From the Enterprise CA, configure certificate managers.

Obtain the root certificate.

From the Microsoft Intune admin center, create a trusted certificate configuration profile.

From the Microsoft Intune admin center, create a PKCS certificate configuration profile.

Question #99

Topic 1

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS.

What should you configure first?

A. groups that have dynamic membership rules in Azure AD

B. Device categories in Intune

C. Corporate device identifiers in Intune

D. Device settings in Azure AD

Question #100

Topic 1

DRAG DROP

-

You have 500 Windows 10 devices enrolled in Microsoft Intune.

You plan to use Exploit protection in Microsoft Intune to enable the following system settings on the devices:

- Data Execution Prevention (DEP)
- Force randomization for images (Mandatory ASLR)

You need to configure a Windows 10 device that will be used to create a template file.

Which protection areas on the device should you configure in the Windows Security app before you create the template file? To answer, drag the appropriate protection areas to the correct settings. Each protection area may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Protection areas

Account protection

App & browser control

Device security

Virus & threat protection

Answer Area

DEP:

Mandatory ASLR:

Question #101

Topic 1

You have an Azure AD tenant named contoso.com.

You have a workgroup computer named Computer1 that runs Windows 11.

You need to add Computer1 to contoso.com.

What should you use?

A. dsregcmd.exe

B. Computer Management

C. netdom.exe

D. the Settings app

Question #102

Topic 1

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage Windows 11 devices.

You need to implement passwordless authentication that requires users to use number matching.

Which authentication method should you use?

A. Microsoft Authenticator

B. voice calls

C. FIDO2 security keys

D. text messages

Question #103

Topic 1

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices.

You need to enable Enhanced jailbreak detection.

What should you configure?

A. the Compliance policy settings

B. the device compliance policy

C. a network location

D. a configuration profile

Question #104

Topic 1

DRAG DROP

-

You have a Microsoft 365 subscription that contains two users named User1 and User2.

You need to ensure that the users can perform the following tasks:

- User1 must be able to create groups and manage users.
- User2 must be able to reset passwords for nonadministrative users.

The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Roles

Global Administrator

Helpdesk Administrator

Security Administrator

User Administrator

Answer Area

User1:

User2:

Question #105

Topic 1

HOTSPOT

-

You have a Microsoft Intune subscription that has the following device compliance policy settings:

- Mark devices with no compliance policy assigned as: Compliant
- Compliance status validity period (days): 14

On January1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group1

On January 4, you create the following two device compliance policies:

- Name: Policy1
- Platform: Windows 10 and later
- Require BitLocker: Require
- Mark device noncompliant: 5 days after noncompliance
- Scope (Tags): Tag1

- Name: Policy2
- Platform: Windows 10 and later
- Firewall: Require
- Mark device noncompliant: Immediately
- Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On January 7, Device1 is marked as compliant.	☐	☐
On January 8, Device1 is marked as compliant.	☐	☐
On January 8, Device2 is marked as compliant.	☐	☐

HOTSPOT -

You have a Microsoft 365 subscription that includes Microsoft Intune.

You have computers that run Windows 11 as shown in the following table.

Name	Azure AD status	Intune	BitLocker Drive Encryption (BitLocker)	Firewall
Computer1	Joined	Enrolled	Disabled	Enabled
Computer2	Registered	Enrolled	Enabled	Enabled
Computer3	Registered	Not enrolled	Enabled	Disabled

You have the groups shown in the following table.

Name	Members
Group1	Computer1, Computer2
Group2	Computer3

You create and assign the compliance policies shown in the following table.

Name	Configuration	Action for noncompliance	Assignment
Policy1	Require BitLocker to be enabled on the device.	Mark device as noncompliant after 10 days.	Group1
Policy2	Require firewall to be on and monitoring.	Mark device as noncompliant immediately.	Group2

The next day, you review the compliance status of the computers.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
The compliance status of Computer1 is in grace period.	☐	☐
The compliance status of Computer2 is Compliant.	☐	☐
The compliance status of Computer3 is Not compliant.	☐	☐

Question #107

Topic 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure the Authentication methods.

Does this meet the goal?

A. Yes

B. No

Question #108

Topic 1

You have a Microsoft 365 tenant that contains the objects shown in the following table.

Name	Type
Admin1	User
Group1	Microsoft 365 group
Group2	Distribution group
Group3	Main-enabled security group
Group4	Security group

You are creating a compliance policy named Compliance1.

Which objects can you specify in Compliance1 as additional recipients of noncompliance notifications?

A. Group3 and Group4 only

B. Group3, Group4, and Admin1 only

C. Group1, Group2, and Group3 only

D. Group1, Group2, Group3, and Group4 only

E. Group1, Group2, Group3, Group4, and Admin1

Question #109

Topic 1

HOTSPOT -

You have an Azure AD tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.

You join a Windows 11 device named Client1 to contoso.com.

You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

▼

net accounts
net localgroup
net user

Administrators /add "

▼

AzureAD
CONTOSO
UPN

 \user1@contoso.com"

Question #110

Topic 1

You have a Microsoft 365 subscription.

You need to provide a user the ability Security defaults and create Conditional Access policies. The solution must use the principle of least privilege.

Which role should you assign to the user?

A. Global Administrator

B. Conditional Access Administrator

C. Security Administrator

D. Intune Administrator
